THE INDIVIDUAL TRACK MAP

By

L. Ron Hubbard

This book contains charts which give in brief form the three principle tracks in which the auditor is interested.

The auditor is invited to fill in these incident "boxes" so that he will know, at all times, what he has next to audit, what has been and what has not been reduced, where motivators lie and where overt acts are to be found. For this purpose some sample "boxes" have been drawn throughout the charts. The auditor should draw others. The numbers in the boxes refer to what should be written on the line after the number. Here is a sample "box":

```
1 refers to the E-meter action before auditing. This means how the E-meter acted, not what the reading of the meter was. There are five ways a needle acts, as described in ELECTROPSYCHOMETRIC AUDITING. For the purposes of the above box, these symbols are recommended for needle action: V - violent, steep drops, half a dial or more. M - medium drops, quarter of a dial. L - light, barely perceptible drops. S- stuck, fixed needle, very rigid. U - upsurges (to left), a rising needle. T - "theta" bop, a hunting, jerky needle, a very desirable reading, meaning incident MUST be audited. C - clear or reduce.
```

This map is made for the use of TECHNIQUE 80 and TECHNIQUE 88. The essence of 80 is that no incident of any kind makes itself obvious unless the pc has used it against one of the dynamics. When it happened to the pc, it was the MOTIVATOR. When he "dramatized" it or tried to use it, it became an OVERT. When he used a motion (incident) too many times as an OVERT, he came to have a DED, short for DESERVED ACTION; with a DED he came to think of himself as being fair game for anything or anyone because now he deserved to have something happen to him. The auditor then must find the OVERT for every MOTIVATOR, a DED for every chain of OVERTS.

Thus the "box" is made out for any incident. If made out for an OVERT which has been found, add a note to give the number of the motivator.

Some incidents, being very standard, have names. All other incidents are numbered. The number of any incident is the number of years ago that it occurred. Thus the first incident on the track has the largest number. This may seem paradoxical, but it is by far the easiest method of tabulation and is easiest to mark down on the chart. It will lead to a simple accumulation of much data. THE NUMBER OF ANY INCIDENT IS THE NUMBER OF YEARS AGO WHICH CAUSES A RESPONSE ON AN E-METER. This may be, as the charts indicate, hundreds of thousands or trillions. (You may not believe in incidents prior to this life, but if you want well pcs, you'd better audit them; large numbers of tests show that it is impossible to get good recovery swiftly by addressing current life only.)

Don't be afraid to mark up this chart. Don't be afraid to discover new areas in it. If a chart isn't long enough for the area you are working, if you find the space too limited, paste in another sheet for that area. The numbering system permits this.

This is a chart of TERRA INCOGNITA for the most part. No explorer ever had a present of so much little known or unknown territory as the human time track. You and a pc and an E-meter can do very great work by filling it in.

THE COMPANION BOOKS OF THIS TRACK MAP ARE "What to Audit" and "Electropsychometric Auditing" and "Technique 88". Leading to these are the Elementary and Summary Courses in Dianetics and Scientology.

**Scientology** — The science of knowing how to know. Developed by L. Ron Hubbard.

From Funk and Wagnall’s New Standard Dictionary, Supplement No. 5:

**di.a.net’ics** noun A system for the analysis, control and development of human thought evolved from a set of coordinated axioms which also provide techniques for the treatment of a wide range of mental disorders and organic diseases: term and doctrines introduced by L. Ron Hubbard, American engineer. (Gr. dianoetikos — dia, through, plus noos, mind) **di.a.net’ic** adj.
