

# LRHs Hat Turn Over

A lecture given by

Capt. Bill Robertson

OT Convention 10 August 1984

in Halmstad, Sweden

Now first, we will start with - all the way I'm in communication with people in Australia and New Zealand. And I know that's a bit far away from Sweden; in fact you have to go straight down this way to get there. But they are doing very well. I write letters back and forth to the OT groups there and the people who are doing delivery there, and the first group that started off last year was run by Eddie Mace.

I don't know if you know Eddie and John Mace, but anyway they are very OT brothers that didn't like the way things were going in Australia and they broke away from the Church, or the - quote - "Church", as we call it now, quote sign; and they started off an advanced organization in Western Australia.

And they were heavily attacked, I mean legally, with police, reports, the neighbors were called up, their businesses were called up, they had private investigators, they had legal threats, all this kind of stuff. Now that was last year, it was not even a year ago. It was about one year, almost one year. They were there before David Mayo was in Santa Barbara, California. Before that Eddie Mace and John Mace had set up already to go against the suppression that was on the lines coming through the "Church".

Today they have moved into their second location, which is a much larger building, I don't have a picture of it with me, but it looks something like one of the large shops you would see out in the streets in Halmstad or in Gothenburg or Malmö, and it has a large, long training room, and many auditing rooms, and a very nice reception in a parking area out in front, and they also have another building across the street not far away, where they do individual advanced levels with NOTs auditing and confidential materials and so on like that, and they are sending out regularly a magazine and a newsletter and telling of all their wins and the successes they're having there. That's in West Australia.

In East Australia, around Sydney, there is a delivery group up there started also. And they are doing consulting auditing, and they hope to open up their advanced levels very shortly.

In New Zealand there's also a group that are doing about the same thing, they are still small, they haven't gotten as big as having their own building yet, but they are also having much success in New Zealand.

Now, the people there are totally convinced that all of the trouble they're having has come from the RTC and the take-over group, shall we call them, in California. And they are working at so the Australian government understands what has happened.

Now, that's a simple statement, but when you happen to know that - I won't mention any names, but one of the OTs that is on their lines, the Free Zone lines there, is a secretary to one of the most important government officials in Australia. It will maybe help you to understand why the RTC has not been able to shut them down or even make them shrink; they are just expanding all the time. They have one of their own OTs who is right up there in the government. So that's a big help.

Now, as we come around the world there, from South Africa we only heard that there's one delivery group down there and we don't heard of much other new, it's just a breakaway group that were doing auditing.

However, in Europe we have of course much news, as you probably know: the Spanish OT organization down there have set up an academy, where they're doing TRs and meter drills and basic study, because most of the Spanish Scientologists did not get up the bridge very far under the "Church". And now they are starting their basics there, there's about 25 or 30 of them that are becoming trained as auditors and trained as executives, so that they may themselves start up a much larger organization. There's also plans in Spain for setting up an international type organization there, which would be equivalent or even better than what you know as the Flag Land Base. That means that it would not only have training and auditing and very highly classed auditors, but it would also have courses for artists, for people who are in business, for people that wanted to create a new product in society, musicians, things that will help these people make a start in the fourth dynamic.

Then in France we have, in this lower area of France around Toulouse, there are several breakaway groups, in fact the whole of South France is out of the "Church's" hands, and they are delivering rather quietly and so on to each other, they haven't really asked for an event or linked up with this too much, although they write letters every now and then, but we find out that some of them are being sent for the upper levels up to Scotland, and they are up there in Candacraig, the AAC Candacraig. So the French people are going up there. It's a pattern they have established, I don't know.

In Paris we find out there's only a small delivery group there, just one or two auditors that are in the Free Zone, and they are very quiet and very cautious. However, we do have information from the org there, how the "Church" org is doing. It has suffered very badly from the events in the recent years, and we happen to know - whether this was connected or not, I do not know - but a bomb was set off in the org of the "Church" there, several weeks ago, and luckily I don't think anyone was hurt, but they destroyed a lot of their property and caused a fire. And I think it was done because of somebody who happened to be on staff that was involved in

drugs. That's the rumor line, that's what it says. But we do know that the recruitment is getting really - shall we say, they are just scraping the bottoms of the barrels right now. Actually going under the barrels and picking up a few worms from the ground. I have a lot of similar type reports, that the ethics officer for instance. from the New York organization one year ago was a wanted criminal by the police, and he finally had to give up his post to go to jail. This is the kind of "Church" that's being run.

Anyway, in Switzerland, we have all levels being delivered there in Switzerland, and it's very interesting thing in Switzerland, you will find high up in the mountain in one place in Switzerland, there's a little group of OTs, about six of them, that are helping to fight the theta war against the black thetans, and they are up there, and they are actually doing mutual protection on each other, and cancelling out beams and bad intentions by other beings that are working against Scientology. They are very successful at it. And they know where it's coming from, too: Basel. So, anyway, Switzerland, they are doing well.

I think that Erich can probably tell you more on what's happening in Germany, but most of you have heard that a few weeks ago at the German event we had down there, the RTC made a very serious mistake. They tried to arrest one of our members, and they succeeded for 24 hours, but within the next 24 hours a hundred policemen descended upon the org and went into seven executives' houses and took several *tons* of documents from them, on which they are going to have to explain how they broke about 30 to 31 German laws in the very near future.

So the government is not very happy with the "Church" down there, although they are very happy with the Free Zone, and they have given everyone there a sort of "Okay, go ahead, set up, do Scientology, that's fine, we just don't like all this illegal stuff that's going on from this 'Church' that comes from California." So the "Church" is not doing too well in Germany.

There are also delivery groups in Frankfurt, Hamburg, Stuttgart, and there's 23 people on the comm course in a town nearby Frankfurt. That's all on the independent side.

Now, in Sweden you know best. I don't know all of it, but I'm sure you will tell, your own speakers will tell that. In Denmark, I'm sure that Per Gerström can tell, they're right at the... Per Gerström, what did I say? He's not okay...Per Schiottz will tell... I had him on my mind recently, because we were testing him out.

But Per Schiottz will tell us about that and as we go over to England, I can say that there I'm very pleased to see what is happening there, the idea of the cottage industry has come back, the little small industry, you know, and it looked to me like somebody took an org board, a regular Scientology org board, and they went with a pair of scissors, and they cut out all of the little departments, and then they threw them around like this, but funnily enough it works very well. In East Grinstead for instance, if you want to have something typed or something copied, then you have to go to the little piece of the HCO org that is sitting in East Grinstead.

And they have Free Zone people there that give Free Zoners a discount for doing the typing and copying, just like an HCO Area Secretary would do in their office in the org board, you see? And then you have another group that does nothing but Div 6 introductory lectures. And they have a little piece cut off Div 6 over here, you see? And they have other people that are

doing just training, and they are in the Training Department and just train people. And then there are other people that are doing Comm Course, you know, like an introductory course in Div 6. And then there's others that are doing regular grades auditing, and Dianetics auditing and so on, and then there's others that do the advanced levels and NOTs. So you can get your entire route through the bridge there in East Grinstead, by going into many very beautiful little English houses, you know, stuck away in the various places.

And in London, a similar thing is happening; we just had the paper come down the other day, showing about ten different locations where you can get various services in London. And as you all know, in Candacraig in Scotland, that's where Robin Scott, the famous Robin Scott went back there, he's now receiving newspaper... every week about there is a story in there about him of the newspaper, some of them, most of them are very good about him, you know, showing he's the Scotsman who struck out for truth and freedom and so on, a picture of him and his lovely wife and the castle, you know, and he's like becoming a national hero up there.

And recently they had a special day in Scotland for celebrations, and the Royal Scottish bag-pipe band, you know, the ones with the wooh-wooh-wooh, and these bag-pipers all came and marched, and they marched into his place, and played there and they had drinks and everything like that, and it was very good press about this. So he is regarded now as one of the, as I said... see, his whole idea, he read "Battlefield Earth", right, and he mocked himself up as, he liked the idea of what Robert Defox was doing, you know, the Scottish friend of Johnny in "Battlefield Earth". And he was always doing the raids, you know, and helping out, and doing this, and getting the Scots all together. Well, that's what Robin Scott likes, he likes that.

Because last Christmas, I went up there, with Mary and Silvie, we were invited for Christmas and New Year, and we gave him a big sword like that, with the Phoenix inscribed on it, the words to a song called "The Phoenix", about a phoenix rising to freedom. And he has that hanging up in his manor, in the big house. So he's doing quite well up there, and he has now - when I was up there in Christmas and he had invited people, these were invited people, so we came up there, he had 24 people there, sitting around a big long table and eating and so on, and now, it's only his staff there, which is only about six people, but he has 40 people around the table, and they are all taking services there, the rest of them, about 30 of them are taking services there.

We recently compared very quietly, because in the Free Zone we don't push stats like they do in the orgs, we push products and people getting happy, good results from their services. But we did a secret comparison in England, it was done by the OT Committee in England, we compared the stats of what the "Church" was doing in England and what the Free Zone was doing in England. And they did it on the basis of, as you well know, all these things, you know, well done auditing hours, number of students on course, number of OT completions, that kind of thing, you understand what I'm talking about, stats, and they did those, and they found out for the first time that in the independent Free Zone the stats were higher than they were in all the Churches added up in England.

So they all felt very good, you know, they didn't like to brag about stats, we're not RTC, we're not going to say, "Get your stats up!", you know, but they did say, "Hey, it's great to know that we're producing more than they are, now, and they are going... very low. There is only about... last we heard there was only about seven people on the "Briefing Course" at the "Church". And the similar statistics apply elsewhere, there's one org, I think it's Plymouth, it's about to close down, there's no one there. So they are just shrinking.

Anyway, that answers that question, there's a lot of Free Zone in the... oh, in the United States of course, I didn't mention them, we don't get much accurate reporting out of the United States, because there are no OT Committees there, and because in the U.S., having born the thrust of the entire scenarios themselves, and with the cooperation of the national newspapers and the FBI and everybody else over there, they are really still in a bit of a confusion. Except for people like David Mayo and the people that are actually helping the Free Zone over there, which is... should be a lot more people doing this.

But anyway we do know that David Mayo has something like 6-8,000 people on his lines in his CF that he writes to, and his place is always full of students and preclears coming along. And similarly all the other groups that we know of, like Larry West down in San Diego, and the guys in Denver at "Survival Services", or now it's called something more like "Advanced Survival Services" or something, they are expanding as well in Denver, Colorado, and there are several other groups in California that are all doing very well. The only thing we haven't heard from recently is the east coast, we don't know if anything is happening for the Free Zone on the east coast of America.

We do know, however we've had people also, I heard you had people that went to Flag here recently in Clearwater, and we heard that the main thing is they were interested in doing down there was sec-checking people, and even on advanced levels, they were still finding out how much money the person had, and then they were allowing him to have, you know, ordering him to have so many sec-checks in between his next levels, or his next intensive, so that he was using up the money. And many people came back to England, and they were totally ARC-broken with the whole idea, and most of these were people that had stayed in the Church, because they had already given the money. They had already money at Flag. And then they were down there, and they came back totally ARC-broken anyway. They thought they would... "Ha-ha, I have money there, I go and get my service!" And they went to get their service, but they didn't get it!

And one of them who was very much ARC-broken, who was a large publisher called Lilian Collins, and I don't know if you ever read a book in English that says on the bottom "Collins Publishing Company". Anyway, she was the heiress of that company and she went down there, she was not in the independents, she was not in the Free Zone, she had so much money she didn't care. She went down there and offered them a simple thing, she said "Look, your prices are too high. Your book prices are too high. My family's been in publishing for a long time, I'll print your books in paperback and make the prices low so you can get more people into Scientology. How about that?" She was there nine months, she was doing high level stuff. You know what they did? Critical of management! Critical of management, sec-check her!

They sec-checked her for another 50 or 100 hours and when she came back she joined the Free Zone. And so did her daughter. So now that whole family is in the Free Zone. So anybody that is silly enough now with all this evidence that's been coming along to think that Scientology is still being delivered in the Church is totally mistaken.

The last vestiges of tech were being delivered there when David Mayo was still on the lines as Senior C/S and after he went off the lines, it was not being delivered there standardly anymore. And many people have asked also "Well, how did Ron let this happen?" You know? So like that. And you can always look at them and say "What happened? Scientology is still here. There are a lot of people out here doing it, and it's free this time. Free from control."

Everyone has a chance now to do exactly what Ron did. Start up Scientology in their own area. I would say, if you could not figure out a way and he did give you this problem in his policy quite a lot, he told you in there in the policy. One of the most difficult things to figure out how a person who is ruling, king or a dictator or whatever it is, if he has got a good regime, a good kingdom going, a benevolent dictatorship even, how does he succeed himself? How does the next person come along? How to do that. It's always been a problem in policy and for that you've seen many solutions. You've seen counsels, committees, networks... all these various things were attempts to how do you take the hat of LRH and make sure it persists.

And this is not only a problem in the 3rd dynamic of Scientology, it's a problem in the world. I mean, your history of every country in Europe, you just go back through it and you find out that there was a good king named Olaf but the next guy was a shit. See? The same thing in every country. Now you go into other churches, you find the same thing. I read a history of the Catholic Church before I came over here from the Encyclopedia Britannica. Do you know that in the year 1100, 900 years ago maybe you remember it, but there were two popes. There was one in Rome and there was one in Avignon, France. Two popes. Now if you know the Catholic religion, you know there can only be one pope, right? So of course something had to happen. And guess what they did? It was so funny, it was hilarious, even the Encyclopedia Britannica thought it was funny. One pope in Avignon excommunicated, or declared SP, all of the people in the other church from Rome. The other guy said you can't do that, and he declared all the people in the Avignon church and the pope and everybody SPs, excommunicated them. So for a period of a few years there, there were absolutely no Catholics on the planet. They were all out. And that was the joke the Encyclopedia Britannica made, for a short period there were absolutely no Catholics on the planet. Each side excommunicated the other side. Perfect duplication and as- isness right?

It's interesting as to how that problem was solved. Another force on the Hapsburg line over in Austria realized that it couldn't go on like this. So he created a third pope. Number three. And he called the other two guys there before he let it be known. Called the other two guys there and had the third pope excommunicate both of them. Yes! Now anyways, it went on like that for a century or so. But anyways, you can understand that we are not the only church that has had take-over problems. Okay? In fact it happened in the Buddhist religion as well. So we are not the only one that had that. How do you succeed yourself? In other words, the question is in the Catholic's mind "Once Jesus has gone onto the cross, how do you figure out who the next guy is

to carry it on?” Or once Peter and all the disciples have died, who should run it? You see? Wow, how do you do that? And once LRH goes off management lines, how do you run Scientology?

Well, I think Scientology has found the solution because it had the right tech. And the tech produced the products of people who were clear and OT. And new policy, they know the policy. And it produced the results. So when LRH decided to retire from management lines, and believe me, people ask me all the time “Where is LRH? The body of LRH?” I don’t know. But I do know this. LRH is so OT that if he wants to keep himself hidden from you for a long time, where his body is and so on, he will do it. And he’s very good at it. But anyone can communicate with him spiritually. Right? That’s not the same thing. There is a difference between a thetan and a body. Most people are asking “where is his body?” I don’t know and I don’t know anybody who does. So anyways, it’s a good game. I hope that I can do that too, when I am up to that level.

But he said, how do you do this turnaround, how can we keep Scientology going? The networks have always been arguing with each other, the committees and all that, they are too slow. They can’t make decisions, you know. There’s always differences happening here and here. Management is always demanding the stats without looking at the products and there’s evaluations that it’s not going well because they make wrong evaluations and somebody gets on top and tells them to make the evaluation this way. And then the ethics goes this way and it goes in and out.

Well, the best thing to do is to turn it over to those who are strong enough and OT enough and knowledgeable enough to make it work. Because the end result, Scientology is not going to be known as an organization like the Catholic church. It’s going to be known for its products. The products. It’s going to be known for its products, clears, OTs, people who can handle things and so on. And that way it becomes more or less a thing everyone can have, everyone can use. Therefore, it is much more than a religion. It is not just a religion. Although that’s the way it was started out. What it is, is the thetan’s, shall we say, his own textbooks, his own library, his own information, his own knowledge. Every one of you here have studied Scientology, you carry it with you forever. You don’t lose it. That’s one thing you find out, I mean you just don’t lose it at all.

Once you know the data, you know it. Once you get and have wins, once you understand the cognitions that you have on the grades and so on, you never lose them. Right? Everyone who has had a result in Scientology, and you’ve talked amongst yourselves, you go back and you say “Hey! I remember when I cognited on that grade! Oh, yeah. That was great! I remember this and this and this...” The guy can have it again. He can have it again. They’re always talking about their wins, they’re always talking about their realizations, they’re always talking about attainment of truth. And that is the difference between Scientology and any other organization.

In Scientology we go for the truth, the truth about the being, the truth about his past track, the truth about his association with other beings, the truth about his future. We go for the truth. And when you get that, you have an as-ness. You don’t carry around boxes of mass with you and all kinds of problems and have to have large buildings sitting around with images in it and go in there and say “I pray to the god of the e-meter that I might have a good session. And that

my meter doesn't become discharged during the session." And you know, things like that. And I pray to the god of Ethics that my stats will be up this week. We're not doing that, you see? We're not doing that. We're not doing that. So everyone has it for themselves. That is the product. That each person becomes a product, but also becomes the possessor, the owner, of all the knowledge and all the tech. That's what they become. Therefore, the best way to carry on Scientology, is to carry it on in each individual that is a product of Scientology. You see? You may look at it very humorously, from LRH's viewpoint. Now, let's separate out LRH's hat of researching and discovering and codifying all the technology and policy. That's his hat here. And here's LRH the individual, the person with his own interests and so on like that. Now, let's just take this part here as he may be as he wishes to be.

Well, let's take the part he did here. And this is the part he's asking you to study and this is the part he is asking you to cognite on, because this is the truth he's found. He said "it may not even be what I would want to have in the universe, it may not even be something I like to have there. But that's what I found and that's what it is."

So you study it and you go "Yeah, that's right, that's right. Oh yeah! Great! Yeah! Fantastic! Whoa!" Like that. [Laughter] You have a few cognitions, three, four, five... Ok, you have five cognitions. Now what happens to this data? What happens to all this knowledge? You are responsible to then give it out to others. This is the distribution cycle. Remember the distribution cycle? The org board goes around in a spiral like that.

You come in at recognition, HCO, and you go through dissemination, treasury, tech, qual, into the public divisions, through them. Right? And the policy says you come around to a higher level. We will all find ourselves on a higher level org board at the source cycle again.

He said that, it's in volume zero. First book of policy. Volume zero, the org board spiral, we will go through a distribution cycle that we're going through right now. But some people have already gone through the distribution cycle, they've received the knowledge, it's been distributed to them, and now they can come around and start a new source cycle. With the same knowledge here, they don't have to be LRH. You understand? They don't have to imitate him or be in his valence, all they have to do is have the integrity of LRH with this knowledge here. And say "LRH found this. I've found it works and therefore I give it to you. It works." And it starts here for you.

That's what he wants when he says "I want you to wear my hat." Remember, he used to say every post in the org like a hat, wear it as if I was wearing it. Wear the hat as if LRH was wearing it. Well, that's how you do it. Because all the years I've worked with him, I've found nothing except the fact he follows his own policy and tech closer than anyone else I've ever seen. Every one of his handlings on the ship, every one of his technical C/Ss, everything he did in the years and years I was able to observe him there when I worked on the ship was exactly per policy. Exactly per tech. So when he says wear the hat as if I was wearing it, he says "Here's the hats," and he wrote them all out for us.

So, if we have that knowledge, we can pass it on to others. We can move around the org board and become the source and the area for the tech, the policy of LRH and say "LRH found it,

I am carrying it on to you because it works.” And that is a truth line, that is a knowledge line and that is a line that no one, no one can harm. No one can not get out. No one can stop it because that is the way to carry on. Through time, through space, and through the future. That is the way LRH figured out to replace himself. How does he replace himself? With all of us. Wearing his hat in our own area. And if you are just wearing it in the auditing area, in the tech area, whatever area it doesn’t matter. If you just wear it, the whole thing will come. Around the planet we will grow, Scientology will never be lost. It will never be taken over. It will never be changed as long as the basic tech and policy carries on. People wearing the hat as if LRH was wearing it.

And in the future, you can never be fooled. Some people were fooled with this “church.” But you can never be fooled again, because you’ll know that if anyone comes with those types of actions, which are not per policy and they are denying the use of policy and they’re squirreling up the tech and they are messing up the actions that usually are found in a LRH org, then you know that they are not on this cycle of source. They are not on source, therefore that is not LRH policy, it is not LRH tech, it is not Scientology anymore.

So, what do you have now? You have the chance to become source of Scientology and Dianetics in your area, and you have the chance to of course go up the Bridge, and you have the chance to actually create a new game. A new game. Because once you start doing the actions of tech and policy, you realize that YOU are now in a wonderful position of creating a new game in your area. You are. And then you’re moving up to cause. It’s an OT ability, to create. So you move up, you’re creating a game, you’re becoming more cause, you’re becoming more OT.

I have said privately and then publically a little bit and then I say it here now, all the auditing does not take place in the auditing room. From my observation of what LRH did during his life and what is successful now, all the auditing does not take place in the auditing room. There is a time when you must come outside the auditing room as a Scientologist and take on the whole of the third dynamic, the fourth dynamic and say “this is my auditing room now. This is my space and here are the aberrated parts of it and I’m going to handle those. And this is the question. Boom. And this is the answer. And there is the policy there and will go in there and handle that bit of bank. Alright, good. Now over here there is some more we’ve got to handle.”

You’re out there and you find that you are auditing the third and fourth dynamic. And boy, wait a minute, you suddenly feel hey, now I know what LRH meant when he said if you apply policy to the environment around you, you will win. You will succeed. And if you don’t, you won’t. And if you apply tech, you will get people up the Bridge and you will go up the Bridge. But if you don’t, you won’t. Because that is the truth line.

That’s all it is, it’s not an opinion. It’s nothing else but the agreements we made coming into the universe, now looking at them and getting all the aberrations off them, and we’re going back out. And we’re getting more and more causative. And if people do not see it that way, if they try to control you, try to force you to do this and this, they’re just trying to push you back down into a position of effect. Effect. Where LRH has given the answer, this is what he intended was that people should move to cause point.

And now he's given us the chance, in a very short time compared to the whole track, and in a very short time, nearly four years... I think that everyone now has the chance to become cause in their own area. Source of Scientology and Dianetics, auditing on the third and fourth dynamic, handling things, making a new civilization here. And just moving it right on out through the sector, through the galaxy.

Now, you will hear a lot of people from the United States. They come around and they say "we heard in the newspapers that LRH was just in it for the money. Mary Sue is a criminal and nah nah nah nah..." and all that. Listen, those people are still at effect. They didn't work with LRH for many, many years. They didn't watch him working 18 hours a day. I mean, if you were with LRH on the ship in those days, and Sven will tell you, you felt ashamed personally that you could not keep up with him. He worked more than any of us. Alright. And he studied more and he researched more and he did C/Sing more and he did incredible amounts of work for all of us to put the tech there and so on. By the time before we even started the Flag Land Base, we had over \$100 million to org reserves for the use of building orgs, for the use of protecting Scientology in the world and so on.

If LRH was only interested in money, he didn't even need to go to the United States and have his son assassinated and his wife put into jail and his family broken up and his granddaughter taken away from his daughter. He didn't have to do all of that. Before he went into the United States, he could have just said "Ok, I'm going off to Bulgravia and I'm going to bribe the police and all of that," and we all would have helped him. Say great, how much you want? 100 million? Great, go ahead. Fantastic. He didn't do that. He said "all the attacks on us are coming from the United States, so let's invade the buggers and put Scientology there!" Everybody said "Yeah!" And that's what he did.

He put the Flag Land Base right there in the United States. He started up the whole Cedars complex with \$25 million of the reserves in the buying buildings. The Cedars complex and that enormous complex in Los Angeles and he set up the film unit so he could get all the tech down, with a total filmed, duplication of the correct TRs and everything so it can never be altered. He kept working 18 hours a day at it. So I think that these people who are coming from the United States, these rumors, these stories and so on. We know they are part of the scenarios of the enemies of Scientology put in the newspapers and all of that. You've read my bulletins on that. It's obvious it's number seven, the black PR scenario. He's still in it over there.

It's up to Europe to show the way of standardness, on sourceness, and caustiveness and just keep booming over here. We just heard recently that the RTC, using "church" "terms" about "ethics" declared all of Europe for them in liability. Ha! That means all the "churches" are in liability. Well, we think they are a little bit lower actually. Let's use the tech correctly. Many are in confusion, some are still in treason, but they are way down there. So anyways, they are assigning them a wrong condition.

But basically it shows something. They do know that something is going on over here. And what is going on over here is truth and real Scientology. And they can't handle it. You cannot handle it. There is no way you can defeat the truth. There is no way you can defeat on

source tech and policy. No way as long as each person is taking responsibility. That's what they can't understand over there in RTC and in the US and in COST, church of spiritual training or technology or something. With Sherman Linsky sitting up at the top, the Siberian squirrel. That's what his name means, Siberian squirrel. He can't handle it, those FBI MI5 KGB agents that are working for him cannot handle it, the rip-off money guys like David Miscavige and a few of the other guys around him cannot handle it. No matter with all their money and all their lawyers and all of their private detectives in the world cannot handle it. They are going to fail because they are not on the truth line anymore. And they never were. And you know that and I know that. So there's nothing to be worried about at all.

Just be very happy that you, one have the chance that LRH was such a great genius that he gave the one answer of how to succeed himself and we are the first people in Europe, Europeans and Australians were the first people to cognite on it and start up Scientology again. Real Scientology. And also that you are in an area, an environment where we've already gotten OT committees, which are totally on policy groups as in volume seven, started up so it sort of protects the whole thing and keeps it coordinated with communication and warnings for you if something's coming down that we need to handle. Got all that set up. Europe is in very good shape and LRH said, just to show you his postulate in 1966, if anything ever goes wrong in the United States economically, politically, or militarily, then Europe must be the one to make Scientology survive. He said that, it has now happened. It is now true. I don't know anybody who predicts the future that very closely, must really know what he's doing.

So here it is, and we've all got the chance and we all, I think, after living in this universe for so many quadrillions, all this track and everything like that. We've never had such a wonderful chance to keep on becoming at cause and to keep on going up. Because many of you have been leaders in the past, and many of you have also worked for leaders in the past and I know you look back on it and it's like big wins. You had great wins. I used to run this whole planet here and I used to be a king here and I used to do this, you know? And I worked with these guys and we did this... Yeah! But did you ever figure out how to keep it going through time? No. None of us did. None of us did. Well now I think we got the answer. We have the answer.

LRH figured out how to keep the good times going. And the good times are going because he gave the hat to everyone. Here's all the knowledge, all the tech, and that's what makes all the power. So you guys have it and do it. Trust us all, give us the hat, we do it. And we also know another thing, if you don't do it right it won't work anyway. So the only way you can do it wrong and keep it going is to enforce it with a lot of private detectives, police and money. It doesn't work. Sorry, that doesn't even work.

So I think we owe a vote of thanks and appreciation to LRH for that and I like to give him applause because, in all things spiritual, no matter we're not a church exactly we are a little bit higher than that maybe, because churches are things that are established on Earth to venerate something in the spiritual universe. And they have to do this MEST thing here. It's a piece of MEST with kinds of altars and buildings and comm baskets and things. It's all MEST. But a church is a piece of MEST which is there to venerate or to praise something in the spiritual

universe. And it may be an organization as well. But it still has to do with some more MESTy things.

I think that we have a little higher level of attainment here. We have a higher level which is knowledge, truth, spiritual understanding of each other and of theta in general. And those are the true things of power, the true things of the future, the true things that will keep us all winning throughout the future. And up spiral, because we all know. Remembering back, yeah it was a little bit of a down spiral in some places. Go back to the up spiral, we now have the way to do it. We have the way to do it. Stay on the road to truth. And for that road to truth, I'd like to thank LRH. If you'd join me, just give him some applause for that. Could be anywhere, right?

[Applause]

Who's next?

END OF PART 1

Part 2

We now have to do it all again. Yes, really. For the first time, yes. But, it is very much like the story of the airplane, they are testing out the new, automatic pilot in the airplane. It's a totally automatic, computer-controlled flight from Stockholm to San Francisco. And the plane is over the North Pole and the automatic speaker comes on, there's no pilots on board or anything, you see? It's all automatic now. People are sitting there, they've been automatically served the food, they're automatically shown a movie, they're automatically relaxing, they have their tranquilizer. [Laughter] And a voice comes on and says "You're now 30,000 ft above the North Pole, the temperature outside is -270 degrees and there is a storm blowing around the North Pole as you can see below you, in which, if someone was outside in that as you are dressed in this airplane, they would not survive for five minutes. But this flight is totally, automatically computer controlled and nothing can go wrong... go wrong... go wrong... go wrong... go wrong... go wrong." [Laughter]. Ok, so much for automaticities.

Again, we are called upon as products of Scientology to take a viewpoint of causitiveness. The planet, in the situation it is in, cannot be handled by automaticities. It cannot be handled by more lowering of peoples' awareness so that they will not be aware of the problem. It can't be handled by more drugs and more tranquilizers and more TV telling you that everything's okay and more telling you in the newspapers "let us handle it, it's all cool, nothing will happen," more bank accounts, more numbered accounts, more computer control. It cannot be handled that way. It has to be handled by alive beings.

Thetans that understand the principles of Scientology and the rights and duties of individuals and thetans in the society. Now, that means essentially that the people who can speak now about the fourth dynamic would be those who have some processing and some ethical considerations. We cannot expect a person who is going around and selling drugs for instance, and trying to make children into idiots by teaching them lies or rewritten history, we cannot expect those people to make decisions for the fourth dynamic. They already have out-ethics. But Scientology does have, also, codes of ethics and it basically comes down to the principle “the greatest good for the greatest number of dynamics”.

Now if you have a fourth dynamic, you have to look at the entire planet and the people upon it because they are all involved in it. Now I know Sweden has a wonderful history of research and study about the problem of what is happening in the world and they’ve had many solutions to these things. They’ve had many solutions to these things, but not all of them have been adopted and some of them are not really good solutions, as you well know. But right now, the major line of attack on the planet... I wouldn’t say line of attack, I would say line of development on the planet, is toward a thing called mental control. Now that means that the people who are in power on the planet believe that if they control what you think, that you are totally under control. And in actual fact, that’s right.

Nothing wrong with that, to believe it. It is true, if you control what people think, you can control them. The only thing wrong with it is with what intention are you controlling them? What is the purpose of controlling them? Are you going to allow them to get more and more able, more and more spiritually free? Or do you want them to act more and more like a little white rat in a little cage? You know, he has his little cage there, but you give him a little thing to run around in and it makes him think he’s free. Because he keeps running all day long and he never gets to the end of it.

So they also know that if they can give you enough problems with your bank account and your tax man and your job and your salary and your food and your health and all of these things, then you are running around in this little cage. You never think that you are not free. You just think you have a lot of problems and you have to get through these and somewhere on the other side, we will expand.

But when you realize that this is not entirely the case, this is not entirely right, somebody is setting this up for you. They are setting it up in different countries in Europe and in different countries around the world. Especially in the European and the American civilization. I have been researching into this, because I was forced into the research by following a data trail. The data trail was how did the Church of Scientology get suppressed and who did it. That was the data trail.

And I found out how it got suppressed and who did it. But I also found out that the guys who did it, or the beings who did it were not only interested in suppressing Scientology and keeping all the knowledge for themselves and using the power of mental control on civilizations, because you see Scientologists are the one people who are very difficult to put mental control on.

Very difficult to mentally control a Scientologist, it takes a lot of effort, a lot of money, a lot of lawyers. So anyway, I found out they are not only interested in Scientologists, but other religions as well, political parties, educational institutions, financial institutions. In other words, there was an entire, shall we say plan, to take control of the planet economically, financially, spiritually, and individually on everyone.

Now, this is not such a good idea if they don't have any plan for rehabilitating anyone, they don't have any plan for getting anyone more aware. And they don't. What they have a plan of doing is reducing your space and your awareness down to about this big and putting you in a box about that big. So that you think you're free. If your awareness is only this big and you are in a box that big, you haven't found the limits of your awareness yet.

So as far as you are concerned, you are free. The only thing wrong is that it goes totally against the purpose of Scientology, which is to get your awareness expanded out as far as you can expand it. And if you do that, you will find yourself rapidly running into the walls of these boxes.

And I don't know in Sweden, how much of a box they are putting around people here. But in other countries they put quite small boxes around them and if you are anything above Grade 0, you run right into them. And in some places you run into them on Dianetics as well. But, let's say Grade 0. You start to put out your comm lines, you see? And you put out these comm lines, you say "Hey! Yes. Scientology, it's very good." I'm going to put out my comm lines, I'm going to make a new product here, a new industry, new things.

I'm going to get in comm with these people over here that are working on health foods and clean atmosphere and so on like this. I'm going to work with these people here and yes, we are collecting a lot of money here and all of the sudden you find out somebody is against you. And the next thing you know you are being investigated by the tax people. And the next thing you know they are holding your bank account and you cannot move anymore, you can't travel, you can't use any money.

They are investigating you because one of these people you were talking to he was apparently, he was on the wrong side of the political fence or he might be a bad guy or he might be a KGB agent or something. But, this is all balony. You know that's not true, I want to expand, try to put my comm line out. Put some over here to a lawyer and try to get this handled and the lawyer tells you no it's not worth it. Don't fight it, that's city hall. You can't fight city hall. No, what you got to do is get out of that group and go back to your business. And the business you're in says no, we don't want you. We heard about this scandal you're having in the paper over there. You're with these crazy people that want a clean environment and that's against industry and industry, you know... if we don't have industry, we don't have jobs and we're all out of work so it's not good to have a clean environment, even if it is killing us.

I mean, somehow it's logical. I don't know. But all of this is gradually, you get all of these losses and you get pushed down into the little box and you sit there watching the television hoping "Well I hope somebody does something about it someday."

Now that's all if you run into it on Grade 0. And on Grade 1, so I'll solve all the problems of civilization and I've got an idea. I don't like all this banking stuff, I'm going to set up a new way where people can have a real, real stable exchange medium and a currency and they're going to be able to do free trade and all that kind of stuff and it goes BAM BAM BAM BAM.

And you're in court half your life and you're wondering what happened here, you know? The banks are all denying you any credit and you can't work with them and all that stuff. You went against one of the plans, you went against the plan. Now you're in the box and so on. Needless to say, as you go up the grade chart, ARC, service facsimiles, O/Ws of course in there, and you go up there through clear and you go up there on the OT levels, you find it increasingly difficult to stay in your box. You know, you realize you may even find it hard to keep your cat in a box. But imagine these guys trying to weave a whole web of mental control around you, so that you stay in your box. Then you have the idea.

Now, there are certain plans that are afoot in Europe to put people in their boxes. One of them, we have found out, is working this thing through what is called the European Parliament. I understand that Sweden is not in this common market thing and so on like that, but it doesn't matter. This is not a common market. A common market is only the first stage.

You ever think what constitutes a government? What would constitute a world government? Be the same like a state government, right? Or like a country government. But you would expect them to come out and say "Hey, we want to create a world government. Anyone for it? Against it? How about a constitution and all that?" You would expect that, but that isn't the way they are doing it. It's failed two times like that. One with the League of Nations and one with the United Nations.

So now they are doing it a different way. They build the government upside down. Upside down, backwards. Backwards, the last things first and the first things last. This is so nobody notices. So the first thing that they put in was the European common market because that is the regulatory body which regulates trade and exchange between the nations.

Believe me, they really regulate it. There are a lot of people real mad at what they are doing. But one thing they are doing is making agreements with every other nation on earth and every other trade network on earth. So they have a connected network of trade. By the statistics in these books, they now control 40% of the world's trade. It's controlled by the European common market. It either passes through its hands in some fashion or another. They are also linked up to the world bankers who control over 40% of the world's money.

Now, you know yourself that if somebody controls 40% of the world's money and the world's trade, then they are somebody that most people have to deal with. Most countries have to deal with them. Now that is just what they are promoting. That's what they promote in here, they may control a lot more. May be well over 50% by now.

Now, once you know these facts, you want to look at what are they going to do next. Now what they are going to do next now that they have the actual bureaucracy and administration and the government regulation part in, they are going to put the government on top of it. And the government on top of it is composed of this European Parliament people who

meet in this building in Strasbourg, France. It is one member for every 500,000 Europeans. And they intend also to expand Europe to be 21 different countries with a total of 400 million people. That includes Sweden as well, all the way around to Yugoslavia and all the eastern, communist bloc countries. Includes Spain and Portugal. All of those. They already have it all planned out.

Now, what they are doing is that they are putting in, this is your assembly or your parliament or your house of representatives. Lower, lower house of the government. Over on the side of this, they will also have a thing called the European Council. Which is your heads of state of the European nations meeting together like a senate or a house of Lords or a senior house of the parliament. However, that's not all.

Once they get that done, they will put a little bit more on the top. And they will put, by election from these people in the parliament here, they will elect... first they will have a president of the parliament for one year rotating and then they will have a president of the council over here, like the president of the senate or the head chairman of the house of representatives, that will be there. Then they will put in a prime minister. A prime minister and a cabinet. Alright?

Now, I can read you the statement that says exactly that they are going to do that. I mean, I'm not just making this up, right?

It says "The Prime Minister of the Union, that's the European Union, is to be elected by the Parliament of the Union acting on a proposal of the Council of the Union for the future of the electoral term, which is five years. He is to propose ministers of the Union, that's his cabinet and so on, defence, trade, atomic energy, all that stuff, to the president of the Union for appointment. Now, the president of the Union, of course, is this one year post that I told you about as the president of the Council. And the government of the Union is dependent on the competence of the parliament of the Union. It may pass a constructive vote of no confidence in the Prime Minister of the Union. Votes of no confidence may also be passed on individual ministers."

Now this means that the Prime Minister will represent 400 million people, 21 nations, and all of Europe and will be the largest power in the world. Larger than the Soviet Union, larger than America, larger than the third world. It is the biggest, it will be the biggest, that's the way they've planned it. They will be forcing the other, smaller powers like America and Russia and so on into agreements. Because, you see, they have the power that if they side with Russia they can defeat the United States; if they side with the United States then they can defeat Russia. It's very simple.

So they can force them into agreements to come under control as they wish. And they will also set up a banking system where you don't have Swedish Kroners anymore, you have a provision for a currency and an issuing bank which is quite independent of the states of the Union, which means your countries or the institutions of the Union, which means no one has control over this bank. And this bank will be the ones that control all the currency, just as they do in the United States through the Federal Reserve Bank.

In other words, the government does not control the money in the United States. They set up an arbitrary, independent thing, as you all know what that means. It's like an independent

network like the GO and you don't have control over it from the org anymore. So they set up that in the United States and they will do it in Europe and you won't have control of the money either.

Now, why am I telling you all this? Well, this is where the trail led. To this plan. Getting rid of Scientology, and by the way the influence of other religions on the planet... Oh, they don't want religions. You understand? That is a competitive group. The Catholics number something like 800 million Catholics on the planet. The Buddhists number something like over 1 billion Buddhists on the planet. Scientologists didn't number too much, but they had very powerful technology. They could find out things.

Anyways, those guys are all getting attacked. The Mormons, the Buddhists, the Catholics, everybody was getting attacked. So why am I telling you this? Because... nothing wrong with one world government. I've been to lots of planets, lots of planets in the universe have only one government per planet. You've experienced the same in your travels. On the time track or whatever. Many, in fact that's more usual that they just have one government per planet. Much more usual. In fact, you might find several planets in a confederation of one government. But here, you have 160 or 170 governments on the planet. We know why that is. It's explained in your sector ops bulletins, it's explained in 'Revolt in the Stars'. You have here maybe the representatives of maybe 160 different planets or races or different cultures or governments on this planet. The thetans come from those particular areas because this was a dumping ground and a place where some catastrophic events happened quite a long time ago. However, to get this all back together is an admirable idea. There is nothing wrong with it as long as the intention is good. As long as the intention is ethical for survival. As long as the intention is for the increase of awareness and spiritual abilities.

If the intention is to enslave, if the intention is to depress awareness, if the intention is to put people in these little boxes, then it is not a good idea. As you all know, if you studied psychology or behavioristic psychology or any of the modern techniques they all work with rats and mice. Alright? And you can understand that they run experiments on rats and mice. You know? And they put them all in cages and do things with them and so on like that.

If we were all rats and mice right now, right, and our fourth dynamic was rats and mice and humans were on our fifth dynamic, we wouldn't like that at all. See? So, I do not intend to be a human being or a thetan that is taking part in somebody's one world experiment treating other human beings like rats and mice or ants or any small animal they can experiment with mentally, physically, and through all these various methods.

I don't like that at all. In fact, LRH didn't like it either. And one of the things that has come about from this finding, I mean we found this, this is the trace of the line that came from "who suppressed Scientology?", went right back to this one world group, that's working through this principle party here, the European People's Party. Just happens to be a big political party. They are just the front guys for the conspiracy. But, when you come to this you say "hey wait a minute", and you look around to see if anybody is doing anything about it. You don't find any.

There is a few people protesting it, there's a few people saying "yeah, yeah I don't like that. I'm not going to vote for it." But there is nobody proposing any other game. And what does LRH say? When you end off an old game, you must give them a new game to play or the game will be getting you.

Okay, well we got a new game on the third dynamic. Everybody being the source point for Scientology in their area and following tech and policy. Well, now we have a new game on the fourth dynamic. We don't let the GO or anybody pretend to be able to handle it because they can't. We know that. They didn't even grasp the hugeness, the immensity of the plan that I uncovered here and you can come read about it if you want. Alright? They didn't even get close to it... well they did get close to it. It's true, they did get close to it in Germany and Austria several agents of the Guardian's Office got close to this plan and they were immediately ex-communicated from the church by the infiltrated MI6 FBI agent Alan Hubbert. That was in 1978.

I did not find them until just last year and they told me "Hey, you found out the same thing we were working on." So they did start to find it, but the guys got shot, they couldn't get the data. They tried the sane thing, get the data up to LRH, get the data to Mary Sue. Well, they didn't get it there. But now we have all the data. See? We have it all. There's nothing we don't know about their plan to take over and put in a total one world, dominated slave government on this planet.

Believe me, it is mental enslavery. They don't want you to think you are anything but an animal. All of your thoughts will be monitored from childhood and controlled by the idea that you are an animal. Your children will be taught they are animals. That's what they want to do.

And they want to further ensure that they have electronic control over your thoughts by putting in radiation and beams that control your actual thinking. To say nothing of the experiments going on in the United States where they are talking about implanting small chips, very small chips about the size of a pin head in a person's head area or in his chest at birth so they can monitor for the rest of his life.

This is already being proposed to the United States government and they are doing a whole project of experiments with this. I'm sorry to say that spiritual advancement and psychic development, you know development of theta abilities has become a state secret in the United States. It's become a state secret in Russia, it's become a state secret in most advanced countries. "Advanced," they are not really advanced.

Why is it a secret? Because it's a weapon. Just like the atomic bomb was put behind the shades of night into the government arena and nobody could know about the atomic bomb in the 50's, nobody can know about psychic development now. It's the top secret stuff going on behind the scenes and it isn't only theta abilities. They are not talking about that, they are talking about mind control, intention beams, ways to control your thought, small electrode implantation in the person or in the TV or in the automobile or various ways. Keep you all on a national computer scheme. Okay, now those are the coming things they are using for weapons of war.

In a way, this reminds us all of course, of the often, often we run into on the track. I'm sure you have run into the guys called the Thought Police. You know, they always say they are the thought police and they are controlling your thoughts and you better not do anything against the government or we'll implant you or something. And you always find out sooner or later that the Thought Police really were guys of no particular ability except that they had some very clever microcircuitry that they either implanted on you or your telephone or your car or your friends or whatever.

And they heard everything you are saying. Or they had a whole network of spies around and they heard what you were saying. So they pretended to know your thoughts all the time. The thing is, to know everybody's thoughts you'd have to have an auditor for every citizen on the planet in session with them for eight hours a day. Right? And if they did that, we could clear the planet very quickly. So they can't do it that way. In other words, don't worry about people knowing your thoughts because, you know, they would have to have auditors and incredible computers to take all the session data in everyday.

Then they would have to know rudiments to clean up the guy the next day and they'd have to do something with them sooner or later. The guy would ARC break and leave the session. So they might have to just put in the Bridge, you see? So they won't do it that way. They don't really want to know your thoughts, they don't really want to know them. All they want to know is that you're doing what they say and your actions are controlled.

Okay, sorry to make it so blunt. But that is what's happening in the world and it's going on very quietly behind the scenes. I found out that the secret studies into psychic events and psychic warfare and all that is a phenomenon that is experiencing increasing notoriety in the newspapers and so on. You get a little bits and pieces of it. But never very much. They are way far ahead of anything you ever see put out in the papers. We know for instance, that the Russians are using telepathic control on their spy lines right now. They are running agents, over hundreds miles distance, by telepathic control. In other words, they send their messages back and forth telepathically and nobody can intercept them except another telepath.

And how do I know that? Because when I was over in Germany I picked up a few of them going by. I said "Hey, who's that?"

You know, you're used to having Ron talk to you or maybe another Scientologist saying "Hey, man. I'm coming over," you know? Okay, I'll go down and open the door and he's there, you know? That happens all the time with Scientologists, but I had this weird feeling, you know? Just getting up in the morning "Agent Schrinkpov report to Mozidak and go to station B2. Agent Schrinkpov, repeat go to..." coming through as a thought. What the hell is that? Picked it up as lines coming out of East Germany and going to Africa. Right? It was a Russian thought message.

So anyways, believe it or not, if you want to go over to Germany you can try to pick up a few yourself. But we have it from another source. I did not... I told that to a few people and they said "Ah, yeah. Maybe so." However, I then, before I told anybody about that in England, we have another friend over there who is also interested. He has a friend in the intelligence service. And he said the guy was interested a bit in Scientology because of the stuff we were working on

and he said that his friend told him the other day that the Russians were already using telepathy in their spy work. And then this guy came “Hey, did you know the Russians were already using telepathy in their spy work?” I said “As a matter a fact, I did. Yes, I did. I picked up some of the stuff they were practicing with over there in Germany.” Well, anyways he thought it was going to be big news to me you see? But I just happened to be on the lines.

But anyways, the funny thing about this is, the funniest thing about all this is do you see how valuable Scientologists are going to be in the new civilization? They are going to be the only people that know what’s happening. You’re going to be the only people on the planet that really understand what’s happening. Because you can pick up the telepathic comms, you can understand when the government is lying to you, when they are telling you the truth, the overt-motivator sequence, the appearance of people trying to withhold, all of those things.

And as you audit many many hours you will realize that it is very easy to pick up what people are really thinking if you want to. And you can also pick up emotions and various things. Well, from Dianetics you can learn that very easily. And you can pick up the whole thing. Mental image pictures and everything like that and the next thing you know if you put your attention on it, you will find out whatever you want. If you put your attention on your own file, for instance, your own file in the government files in Stockholm or whatever country you’re from, it will come to you where that file is.

And not only that, but you’ll start to get a feeling of what’s in it. And not only that, but pretty soon you will be able to see exactly what’s in it. Now with that, you will find out who the agents are who take care of your files. And not only that, but you will find out what’s happening with your friends who are filed next to you. Do you understand what I’m saying? OT abilities are OT abilities and what it is, is that the governments of the world are afraid of us. Why do you think they are spending so much money trying to wipe out the squirrels? The squirrels aren’t under control. The squirrels can find out anything.

I know I wouldn’t, if we were doing something here and one of you guys started running yoga into your sessions or drug therapy or something like that into your auditing sessions, we wouldn’t spend thousands of dollars on lawyers and private detectives and all that stuff. We’d just quit sending people to you. Doesn’t take much, just “ok say you want to play that game? Go away.” Maybe put a little article in the magazine, say look don’t go to this guy he’s squirrel. We know it won’t work. Well why are these guys spending millions, believe me they do spend millions, to stomp out the squirrels? Because the governments behind them, and not only the governments behind them but the one worlder guys behind them are afraid of us. So never believe anything else. They are afraid of us. Right, that’s where it’s at.

Now that’s your fourth dynamic game level. We are the people that are responsible for the rest of humanity. One: to get them on the Bridge. Two: to sort of hat them on what the mental war is all about. And three: to give them another game to play. And the other game is called the new civilization game. And that, I think it’s printed up in Swedish, but it has several purposes which everyone can agree are good for survival. And those purposes are things like let’s clean up the planet, it’s our house you know? Let’s clean it up a little bit; knock out the pollution, get the

food good, water pure and let's have a stable medium of exchange. Let's not have rates of money going up and down at all, let's get a stable currency here. Let's get a stable medium of exchange. We've already got one by the way, it's called a Galactic Credit and it's going to be based on metal of value like gold, silver, platinum, that kind of thing. But it's also going to be underwritten by the auditing intensive. Standard auditing intensive. Therefore, it will be standard. So wherever you get a standard auditing intensive, this thing will be good and it can always be turned into that amount. It will be roughly what they are charging for a standard auditing intensive in the Free Zone. [Applause]

Now, I have... I didn't bring it with me, but I have colored pictures of these things. We will first issue them out as printed as a credit note on one side where we will have the conditions and on the back we will have where you can turn it in, what Free Zone place you can get your various payments and so on. It will be, first of all it will be a bond type issue. In other words you are buying an investment in some OT project or something and you can always get auditing for it or within a year or so you can get gold or silver or whatever we have at that time. So this will be, we will start them out as investment issues. But they will eventually become currency on the planet because they are so stable. They won't hardly lose value. They won't vary with inflation or depression, they will be the same. The same value can be gotten from these things. Well that's another thing we need on the planet.

Another thing needed is an appreciation more of culture and artistic endeavors. People, there's so many artists and so many musicians, they are given bum education out there. They don't even know the definition of art. They don't even... they are being patronized by people who want them to produce bank art. You know, it's all just stuff from the bank. You know, we went to an exposition in Paris recently.

Silvie and I went in there and who is it... the Pompidou Museum or something like that and I mean... you had to hold your nose around some of the art. Not because... you know figuratively. Physically, it stunk right? They were making the sculptures out of old tennis shoes and socks and trash and things pulled out of the backyard and they just placed it all on a board, you know? It's all mass, junk, crap stuff you know? And they just put some paint on it like that, ketchup bottles and food and open banana skins. You actually had to hold your nose as you went through there. That was modern art, right? It's bank, it's just people's trash. You know, it was real trash. It was displayed in this fantastic building, you know? Wouldn't it be nicer to have some real OT art in there, you know? Some kind of fantastic vision from the exterior or some outer space scene or something? You know, even beauties of the planet. Something more aesthetic and more theta than that. My god! So anyway, that's another thing that's needed.

Another thing that is needed is communication and coordination between peoples. And we're working on this project in the fourth dynamic to try to get more and more of the Free Zone people connected up with like computer links and all that. We're also working on inventions that will improve a lot of mankind, which mean things that can power your computer without depending on electricity. So you can power from sunlight, so you're not dependent on any electrical system run by the government. If they can turn you off, you can still maintain your comm line. Bounce it off a satellite, whatever. We want to put up our own satellites. We have a

company that's on the way involved in something like that. If they come up with some money, well we can put up our own. We have several ideas, I will admit some of them have come off the track and many Scientologists remember things. Can't help that, that's one of the plus points of auditing, you may remember something that's a very valuable invention or something. Run out and get a patent on it on this planet and go with it.

And there's many other things that are needed to make a new civilization happen here. And there are things to be avoided. In other words, things that you should agree with... things that you should not agree with that will lead into the little white mice in the cage thing. You understand? Like voting for things that allow babies to be implanted with a little electrode at birth or the free use of drugs on everybody and so on like this. It's like you have to know the game. You have to know what the alternative is. You have to know to make a choice. And then we come to the final thing. To be able to make a choice, people have to have a datum of comparable magnitude.

You can't make a choice between a one world mind control government and nothing. Although they are trying to make you decide between that and atomic war. See, because they are putting the horror of atomic war over you. If we don't do this, you're going to have atomic war. No, they won't. That's not it, that's false. They are trying to make you decide between atomic war and one world government. That is not the decision. The decision is between one world government and a future like mice or a new civilization where everybody is freely communicating and coordinating just like we do on the third dynamic.

And you can still be your own country, you can still be your own city, you can still be your own group. You don't have to have everybody under the same control to prevent war. War is an aberration. It is, alright? Just like you don't have to have all Scientologists under control to keep Ethics in. You don't have to have them all put in a cage to have Ethics in, because most people are ethical. All except about 2%. That's the figures. See, we know these datums! We know these datums. So who's going to be there to make the decisions between a new civilization and a mind control civilization? We have to be there. We have to instruct people. We have to let them know there is an alternative. We have to let them know they have a choice not only on this planet for their own survival and their own expansion, but very soon they are going to be linked up to intergalactic civilization.

And that is another thing I know you all have been waiting for and you may have some back pay due to you in some organization out there. You may have an old home or an old hunting ground you like to go and see. But it is true that very soon there will be a link up again with the old galactic civilizations.

Now, it's not just because I say so since we found out that these guys are also planning a link up. They're planning a link up on the basis of it would be better if everyone joined this one particular group operating in nearby space. If they would join that one particular group because they are the same agreement, they like implanting and they like to keep people under control. So if Earth comes to the awareness in a few years that there is another civilization out there, and hey look at that, wow its the only one we know about!

Again they will be faced with a choice for which they have no comparable of magnitude datum. They have no datum to compare. They'll say "Hey, look at that! Look at these guys out there, they have airplanes! Oh, wow! They wear clothes just like they do in New York City! And wow, look at that! They have spaceships. And wow, they say they'll help us! And wow, we ought to trade with them! They are very good. They actually want to get in a big agreement with us and have our world government join up with theirs. Woah. Fantastic! You know, that really..." [Laughter]

Funny thing is, the guys are not, when you really look at them, they are not very friendly. They look a bit... theta-wise they look a bit dark. But who's going to notice that if there isn't any Scientologists around to say "Hey look, that's a Marcabian. Those fuckers are implanters. You don't want to mess around with them." So unless we are there to say "Look, there's at least... just in the near space here, you know? There's at least 100 different systems and races around." I mean, if you don't believe so, look at the planet here. Look at the planet, how many races and so on are there around? There's also the same duplication out there, because that's where they usually came from in the beginning. You see? And we know for instance, the Japanese have been working for centuries now and especially since World War II to be able to get back to their own home civilization. Where, as you might expect, they have a civilization very similar to modern day Japan and very similar to the beliefs and customs of working together in an enormous third dynamic. You know, production and all this industry and all. They want to go back there. They're just waiting to get the okay to do space travel and they are going to take off. We know that, we have had it verified from them as well. They are totally interested in the new civilization. So there's another one right there. To tell you the truth... I mean instead of having a nice implant put in your head or something when you are born, I think I would much rather have my back walked on by a Geisha girl, you know? [Laughter]

So if we've got a choice, just between those two, I already know what I would choose you know? And I don't even know any Japanese very well, you know? But I already know them better. Even though, maybe we would have to you know... like slant our eyes a little bit and put the hair down and say "Ah so." So what? That's better than running around with an electrode in your brain and every time you go "Uhhhhh," you know? And not being able to expand, and every time you have an idea you get a cut and suppressed. No, no way. Those guys are expanding. Ok, well that's just another one.

Well, there's a lot more than that and of course there's the best idea of all. Just like we are doing in the Free Zone, sometimes called the independent Scientology movement. Why don't we just remain independent and be a Free Zone planet? Now that's the best idea, see? Then we can make trade arrangements with whoever we wish to the forth dynamic here to the fourth dynamic wherever. If people want to go visit their homes, their old homes or ancestral homes or whatever, they can do that. But if you are a citizen of this planet, you are a Free Zone planet. Then, you know what happens to free trade centers, don't you? You know what happens to places like... used to be Gibraltar and Las Palmas and places that are free trade ports, right? They get A LOT of business! Lots of business! Lots of buying, selling, industry, prosperity so on like that. Right? Lots of tourists, all kinds of things. So I kind of like that idea because Earth has

been out of comm with these guys for a long time because of its problem, you know. Past aberration. It's a very aberrated place. But it's going to be back in comm with them soon, so we might as well make it sort of a festive, joyful occasion and celebrate it like, "Hey, you know it's a Free Zone planet. You guys can come here, visit, bring your money!" [Laughter] "Bring your gold and your other valuable things from your planet and trade them here and you'll get something like maybe 25 hour intensives. You know? And handmade, special art from the planet and so on, you know?" But we could set up a real good deal here. And the next thing you know, we will all be running around in spaceships and own space yachts because these guys want to trade. They want something. And what they want, of course, is good technology.

Because this had to be the proving ground for the technology, right here on planet Earth! This was the worst aberrated area, and it had to be here. As you all know, I mean look at this place. I mean, just the fact it has 190 governments on it. It has wars going on every day. I mean, you know it is a very aberrated place because thetans are basically good.

Well, if they are basically good we must have all the bad ones here. You know, if there is any little chance of them being bad, we must have most of them here. No, it's not that. It's just they've been implanted, they've been aberrated, they've been... you know, had a little more knocking around than most other thetans. But, it can all come right. It can all come right if we do the third dynamic game in together with the fourth dynamic game and let people know...

Hey look, there is going to be a chance when you come up to decide, decide between mental slavery and a Free Zone planet. There is no atomic war there, that is off the schedule. Nobody is going to be allowed to do that anyway. So that is totally outlawed in this sector. Don't have to worry about it. Somebody might try it, but they are not going to get any agreement and there isn't going to be wholesale atomic war, biological war, or chemical war. But there will be a gradual enslavement of peoples toward a mental control where they are forced to decide to join up with these guys here called Marcabians.

And if we don't get in there and say "Hey, look that isn't going to be the only alternative you have. There's plenty of other people. You can either join up with the Japanese or the Muslims or you can join up with the guy the Buddhists go back to or you can join up with the guy that Polynesians go back to, because there is a big sea planet up there they like. There is a lot of water and so on like that. Take the canoes for a long time and you know, eat off the trees. There's a whole planet for that. But you can join up with any of those guys. But, my god you know. Let's not join up with guys who want to just crunch you down further because you have the one two punch that will handle this planet in the future and that is, the one two of course is the third dynamic with Scientology tech and your fourth dynamic with the new civilization." Once you know all that, you know everything that is necessary to know for your survival in the coming next 10, 20 years.

And that's what we've been able to uncover by using the data series and using the investigatory tech of HCO applied to the situation of who's attacking the church and why. You understand? And when we came out, that's what the data showed us. That's what it was. It's been evaluated, it's been verified now about 5 different times by 5 different people. They were

also in the data series and didn't believe my evaluation. And they did it and they can't come to any other conclusion because that's where the data leads them.

So anyways, we were going along that line and we give you the data free and the idea is because we need resources to handle. And we need Scientologists, people who are free, thinking clearly, understand policy and tech to be able to advise the fourth dynamic, to be able to see where it's going and tell people "Hey, wait a minute. You don't want to vote for that law, you know? You don't want to vote for that law about the little chip. No, no. I know it's confusing and sounds like a good thing. But don't vote for the law that says about the little chip. No, you didn't get it. No no no. It says... no, no, no. It didn't say what you thought it said. You thought it said it was going to help you get better food at the supermarket, but it didn't say that at all. It said Intra-clustriacal-biological implantation. Yeah, but you didn't understand that did you? Yeah, no no no. What they mean by that is they are going to put an electrode in your chest right here above your heart right? And if you get out of line, they put a pain signal through it and you have a heart attack." "Oh really? I thought it meant they were going to irradiate the milk so my baby would be healthier." "No no no no no no no. They were going to put the electrode in there, right there you see? And if that law passes, bye-bye." "Oh, well now I understand it. Okay."

You see, people have so many misunderstands today, right? Very many misunderstands, they don't even understand what a thetan is. And that's the first one. They don't even understand they are a thetan. Well, that shows we need some more PE courses around here. You know, personal efficiency courses and basic course lectures. Well, that will come. That will come. But now we know how to handle it.

Anyway, it wasn't handled before. We now know what the game is, spread the news as far and fast as you want, write it up, copy what I've written, I don't care. Just get it out there and let's have a future for this planet that makes it into a Free Zone planet where it determines its own destiny. Not a destiny that's determined for it by a bunch of suppressive individuals that just want to totally control it.

And I think that all of you are for that purpose which I just stated on the new civilization and for keeping it a Free Zone planet. Because you are here and you are Scientologists and you got into Scientology because of who you are. Why aren't a lot of other people here? Because you are here, and you are the people who got into it. Alright? And I'm like that too, I got into it because I felt responsible and I felt responsible for more than I can say at the moment. I couldn't get anybody to listen. Finally after getting a lot of auditing, I realized what I was being responsible for. And that's not only me, not only different dynamics, but also the future. The future of the planet. You realize that? If we don't take responsibility for the future of the planet, we won't have any planet in the future which we can come back to safely, which you can pick up another body in, which your children can live safely. You put the future there. You have to put it there.

There are not many people doing it, I can guarantee you. The only ones that are are Scientologist people and a few little power groups that are trying to take over control. And the reason they are trying to put it there is so that they can control you and all the rest. And the

reason they are putting it there the way they are and the reason you can spot them doing this, these guys... the top of these guys not the political guys, but up at the top. The world bank level, Basel, the thirteen, the three, the secret guys in the little group which a lot of people have heard about in different ways. They think it's a secret society, they think it's this. It's none of those things. It's just a group of a few Marcabian individuals, thetans, that know; they absolutely know that they are thetans and they are picking up bodies down the time track and they are pushing their scenario so they can get Earth under control. And they know this and they keep it a secret from everyone else. Except us.

So really, when it comes right down to it, there are only two groups on the planet. There is the Free Zoners, the Scientologists, and there is the Marcabian one worlders. It's really... you can just break it down to those two categories. Then in that, you look for allies and you look for people who are not enemies, but they are on the other side. And you use the allies and you say "Okay, you guys are against the same thing we are against. This is the alternative, the new civilization." "Hey, I like that! Let's do it." "Great!" The other guys, you say "Hey, you guys. You are being fooled." Because they all are, by the way. There's so many secrets on the other side that they've fooled everyone down below a certain level. And you can guarantee if you go in there and say "Hey, you are being betrayed. At the end of this, you are going to end up being taken over and you're going to end up being implanted, you are going to end up being all of this stuff."

They will go "Wait a minute, maybe you are right." Or they are the people who are trying to take over from those guys and they will be betrayed too because they're letting them. They are allowing them to come along with their power groups and so on to the top, and then they just snip off the top and they have a group. So politics. But these guys are good at playing it because the Marcabians are playing it from a theta game level. And the only people on the planet capable of playing it back at them that way are Scientologists. So that more or less explains what the game is, why they were interested in taking Scientology over, and why they are so interested in spending millions of dollars to wipe out the Free Zone.

In other words, we are the hope for the future of the planet. Just because we have the knowledge and we have the tech and we have the policy. The more people that take that responsibility, the easier it's going to be. And I don't know about you, but I decided to take it when I joined Scientology, but especially after all these troubles happened in the church. And I said "Well, to tell you the truth... You can have a first dynamic reason for taking it too. Taking responsibility."

I told you before in the other lecture, not all of the auditing you do is done in the auditing room. Some of the auditing you do is right outside here. Third and fourth dynamic stuff. Well, you can also have... if for no other reason you can do it for case gain because you will get case gain from doing it. I can't tell you in the last two years how much case gain I've had from doing this particular auditing process on the third and fourth dynamic. Things that were fearsome, things that were horrible, things that are "Gahhh, ewww." Hell, I need one million dollars to handle that. Things that I thought I couldn't handle. I went and just confronted them with that intention of handling on the third and fourth dynamic and they just went pfft. There wasn't

anything there. All they were were the things I had not confronted on my way down the spiral and I just went back and confronted them on the way up. Now, very easy. Very easy, alright? None of the mental control devices they have developed on the planet can affect anyone of Scientology that understands the game on the third and fourth dynamic and has good TRs.

If you do not believe the game of what is going on, well then you are not looking at the truth. I'm sorry. And you can be affected by those things. Because if you don't believe they are there, and they are there and they are pushing in on your case or your bank or your theta beingness or your body and can affect it. Believe me, they are just as there as a car running down the street. And if you walk across the street, even if you don't see the car, and it hits you you'll know it. The same way with these beams and these telepathic devices they've invented and the amplifiers and all this stuff you read about in the bulletins, right? They are there. We have our own scientists researching on ways to counter them and jam them and shut them off and so on. We've been very successful at that.

But in the meantime, if you understand they are there and you have good TRs, they won't affect you because you can spot what it is coming in. And you say "Ah, that's not from me. That's from over there." That's it. Finished. Send it back to Basel, stick it in the tower. Whatever you want to do. Anyways, it's a game that we can play. Because that's a seventh dynamic game, you see? That's not fourth, that's seventh. A seventh, alright. A seventh dynamic game, handling telepathic things, mental rays, mental beams and so on like that. Who can play a seventh dynamic game on this planet? Scientologists, yes. Buddhists? A few, yes. A few other spiritual people who have managed to get up there without doing their grades, keyed-out for a little while. But not many others I'm sorry to say. Just the Marcabians and mostly Scientologists.

So we have another responsibility to get this across to people on the planet aesthetically as well. Because I can talk to you like this, but you can't go out on the street and talk to people like that. Because, first of all, their reality is not high enough. Now I'm doing it, I hope I'm not exceeding your reality, but I always feel in an emergency like this if you're drifting along in a ship towards the rocks, you ought to yell out to the crew "Hey, we are drifting into the rocks. I don't care if this breaks your reality, but get the hell out of here now and let's handle it." Right?

And that's the kind of situation it is on the fourth dynamic because these elections, or these guys right now on the 17th of June will be sticking in this Prime Minister guy and all their political scenarios in the next few months. They have a seven year plan which is laid out in Sector Ops Bulletin Number 19 if you haven't read it. That plan is going along totally as predicted. It was predicted in... or as found out, we found it out and predicted little parts of it and we put it in in February and all the intelligence data we are getting back from everywhere in the world, from different sources, from different lines that are totally... from everything from press, radio, newspaper, intelligence agencies, Scientologists, people who work in the place, other people, just strangers on the street. It's going along exactly on that schedule. One hundred percent exactly. In fact, they are even watching to make sure they don't go behind. And that's good.

Now I bet you somebody's going to come around and say, tomorrow they are going to come around and say "You know the reason they are doing that is because you put it out in the Sector Ops Bulletin. They took that scenario and they are running it!" No, no. They were already running it a long time. They are running it a long time. We just predicted this one because we had to uncover the one they did on the church. So by uncovering the one they did on the church, we learned all about how they do them. It's very simple.

Now on the aesthetic level we want to get agreement. A good way to get agreement is by aesthetics; art, music, and so on and I've written a symphony. The new civilization symphony in b flat and it's music, you understand? I want to get that played by a symphony orchestra and put across some messages to the population. But I just want to read you one thing here. I have a little description of every movement. To end off, I just want to read one thing here. This is from... first of all it covers, I'll just tell you what it covers first.

It covers the old civilization, the alternative which I've just told you about the new civilization game, east meets west because we must have a bringing together of the Eastern spiritual ideas and the Western technological ideas. I mean, we know them. We know there is spiritual matters, we know there are technological matters. But the meeting has occurred in Scientology. Right? Many of you were probably Buddhists before. But the meeting of East and West has occurred in Scientology. LRH made it happen with the e-meter connected with auditing, theta stuff connected with physical electronics. He did it, he brought it together. But it hasn't been done in the fourth dynamic yet. We are hoping to do that between Japan and some Buddhists and some guys over on this side. Okay, so that's East meets West and another one is called "The Awakening." Where people cognite "Hey, wait! I'm more than MEST, I'm more than a body!" You know? And the other guys cognite "Hey the reason we haven't got so far in two or three thousand years is that we haven't been using some tech!" You know? Some technological things. So both sides can cognite. And they can cognite there's a purpose for the planet.

Then the next one is "International City," which is, of course, LRH's plan for world peace written in 1963 I believe and he has a part in there called "International City". Where it's a whole plan for the governments of Earth to meet in the same place and a city built in the middle of the Sahara desert... well not in the middle of it, toward the coast which is the site of the old capital city of this planet. Great plan, you should read it. We have it on our computer. We will get that out if we get some money to publish it. That's one thing. Then the next is attainment, attainment which means when people get on purpose, they can attain what they want. And they will attain their purposes and goals on other dynamics. The next is peace and prosperity, because when people are attaining, their exchange and everything is in, they will get peace and they will get prosperity.

And the last one is called "Ad Astra," which means, of course, to the stars. And this is the one, I'll just read you this a little bit to end off. It says "Ad Astra, to the stars. The hardest aligned and channeled energy of Earth's new civilization is put to use to expand starward. New civilization ideas and inventions have been encouraged and the barriers of space travel have been overcome. This movement tells of the journey to the stars with the firm hope and confidence of

all mankind... Ah, firm confidence of all mankind supporting it. You are invited along musically and as the great ship lifts off, enters free space and makes its course corrections, the voyagers first experience wonderment of the vast beauties of space coupled with the nostalgic memories of their beloved home planet. Then comes the awaited discovery and communication with another civilization far from the solar system and of the joy of finding it to be of similar purposes and aims of the new civilization of Earth. On landing, the power is shut down and in the finale the two civilizations unite to express their friendship and to align their futures for the greatest good of both”.

So we have a fourth dynamic game, it's called new civilization. And we have a third dynamic game, it's called Free Zone Scientology. And again, I want to thank Ron for this because without that, I wouldn't be able to play the game myself. I would then have probably been killed in a motorcycle accident 30 years ago. So, I'm sure you all have similar reasons for being here and not being somewhere else at this time. But thanks to all of this, we can start doing our auditing out there. Not just in the auditing room.

Come out of the auditing room, come into the society and come into the groups. Come into the third and fourth dynamic, all the way up to the seventh dynamic mind you and eighth and ninth and tenth. And we come out there and do our auditing out there. Think what an effect that will create. Yeah... think back to what it says in the Factors. The highest purpose in the universe is the creation of an effect.

So all I can say is, if you are going to create an effect on this part of the spiral, make sure it's an ethical effect. Because you'll be keeping on going up, alright? And if you create an unethical effect, you are going to go down. Believe me, I think a lot of you will support me in this opinion. But this is totally an opinion. But in my auditing and looking at track, I think you can correct me if I'm wrong, but I think most of the unethical effects that could have been created were already created. Most of the unethical, out-ethical kind of things, I've seen them. I've run into it. Now it's time. Hey you want to create a big effect? Well everybody's way down here. The big effect you can create is an ethical effect. One that guarantees more survival. Oh, that's big. Alright, so you want to create an effect. Let's put a new civilization here, let's put a Free Zone planet here. Alright, are you with it?

Audience: Yes.

Are you? Good, thank you.
