

INTERVIEW WITH CAPTAIN BILL ROBERTSON

May 1984

- Interviewer: In the past LRH start with the OT Projects. Yes?
- Bill: Yes.
- Interviewer: OK. Can you a bit say about this OT projects are... [some German words]
- Another person: What kind of OT Project was LRH was working on?
- Bill: OK. Now this was back in 1967? Right? LRH started the Sea Project. That was to make a safe place for OTs, to make OTs because at that time it was considered that the countries were a bit too politically dangerous to operate in. They might be shut down at any time. They might raid the church, or something. You know, LRH saw that happening, you know. Of course it has happened a view times since he predicted that. But he wanted a place that was safe to make OTs in auditing environment that was comfortable and so on. But then he wanted to do projects to basically to make and handle the planetary engram, you know. To handle the forth dynamic. All his projects, I might say, were originally intended to handle the fourth dynamic.
- Interviewer: And what happened?
- Bill: Mankind. You know, the whole planetary situation.
- Interviewer: And what happened with this project, nobody make this?
- Bill: No, no. They were started. All of them were gotten under way, very.... LRH starts something he really starts it. I mean we were all doing it for a year and a half. And handling and doing a lot, doing lots. We were doing all the things that the GO was later supposed to do. Plus some other things that he wanted handled that we... Could only be handled with ships and trained sailors.
- Interviewer: Also this data in the Sector Operation Bulletins, are you started in this time with researching and so on?
- Bill: He started back then. And you will hear it in Ron's Journal '67 he had hired some people to find out who was behind the attacks on the church. And they traced it up to several people who were in high up in the media and banking business. And that was as far as they got. They did not find out what their plan was – and why they were doing it, you see.

Interviewer: We have this "Journal 67" and we have the "Role of Earth". And do you know other references about these early OT projects?

Bill: Yes, I do, but unfortunately one of the best references on it has been suppressed by the church. And I can't get a hold of it. That is an ethics order that LRH wrote in 1967, on Xenu. Saying that he was currently on the planet, and he didn't know his current body but he'd ask every sea org member and every Scientologist to be on the look out for him. And he described him very, very particularly as he did in the later...

As he described him in the film "Revolt In The Stars". That's a very, a true film, that's a true story. And he described him very much and he said that he had, in 1940s, in the early 1940s he had taken over the body of Franklin Delano Roosevelt and has been the one to prepare and order the A-bombs dropped on Japan.

And it went on to describe him physically and so on as I repeated the description in the Sector Operations Bulletin. And told everyone to report immediately to HCO if they saw or heard any action that might be traced to this guy or if they might see him or recognize his, uh, the thetan, recognise that thetan, operating a body. Because he was the guy that would be behind any of the implantations or the various schemes to knock out Scientology or any other spiritual betterment activity.

And that Ethics order was suppressed – it was supposed to be issued out to people on OT 3. LRH didn't issue it out in 67 because people were not even through OT 3 at the time. He said it was going to be issued in a later, later. And, however it wasn't issued on NOTs and it wasn't issued on any of the other levels.

Interviewer: And what's the main OT project, what, um, in these days get worked?

Bill: Well they're the same. They are actually the same. We're just picking up where the GO left off. You know that had done the Interpol investigation and they had done the investigation of the Federal Reserve and they had done the investigation of the Psychiatry... and the investigation of the newspapers and so on to find out. And the people who were attacking the church, where they worked from the World Federation of Mental Health and so on, like that. And they had gotten to a point where they had all that groups seemingly linked together like psychiatry and the press and the banking and the CIA and over here the Mafia. All this guys. That something was sort of like... But something was coordinating them and they didn't have what it was, at that time. So we... I took it up from there.

Interviewer: OK, Yes, and other OT projects? This energy project?

Bill: Yes. And by the way, that's just one project. Was to find out the Who and the current operation and the plan of the guys who were trying to take over the planet at the moment. All right? So that was done. That's been exposed. Now the handling is under way. Yes. That's one project. There was other

projects, right. To create a new civilisation is one of the projects. The New Civilisation is a project . And he started it too, and he even had a tour done in 1974 going around and giving a bunch of lectures with Arthur Hubbard and some other people too. Trying to get people interested in new civilisation. I might add that we were threatened with assassination by the United States government for doing so.

Interviewer: I didn't get the last words, but it...

Bill: That's all right. They didn't like it!

[some German phrases from another person]

Bill: Marcabians, they said "Get 'em"!

Interviewer: Yes, and what's the situation now, in what countries are the most OT... No, I don't want it so special, yes? But what's really the scene now with the OTC World Wide? That's what... Do you have some successes? Say, what you can...

Bill: ... [Laughs a little] Well, there is no situation with it at all. It is operating very well.

Interviewer: Yes, yes. Tell me something. The people want to know what the, what makes, the OTC World Wide.

Bill: Yes, it's essentially, was... That's going to be, yes, you're going to get that in... We have a whole list of achievements to be given out and published at the congress coming in November the 25th and 26th at Alicante, Spain. I hope you get there. We invite everyone there and it's going to be... we have a list, it's a very long list now of achievements that have been obtained. I mean I can go and list them from the third dynamic viewpoint, if you want. I wont even confuse it with the fourth dynamic projects, right? But when it started almost a year ago there were hardly any, in fact there weren't any Free Zone groups because they didn't even know what it was. There was only a few delivery groups around like in Australia there was one and one or two auditors auditing secretly, you know, not afraid to talk but to promote. And after the start of the OTC World Wide and getting encouragement to people and linking them up with communications and answering letters and so on we have had the amazing, a lot of things you can see published in your own book there, all those communications. A lot of those communications would have been impossible a year ago. People were afraid to say those things. Second thing is that delivery groups themselves have come up from maybe only three or four that you could go to or even knew about. And now there is just about one in every country. And quite a view countries have their own Advanced Courses, right. Now, the other thing is the actual assembling of data and files and central files of names is growing. Where there's now thousands of names of people that were, before, all scattered around in a dispersal. And now they're all... Can be contacted if we have

enough money to put out a mailing we can contact maybe 2,000 people in Europe and maybe 6,000 in America. You see?

Tape 2:

If we had the money for the mailing. Well, it's there. We have the nucleus of putting back together the remnants of the exploded church, you know, who threw everybody out. They all connecting back under these delivery groups and under the OTCs and other groups. Whether they say they are OTC or not, it doesn't matter. We know them, they know us, and so on, see. The other thing is we've been able to put in some effective Ethics. Which means that when people are actually squirrelling we just let everybody know, these guys are actually squirrelling, don't go to them. Or if they are below reality, we say: "They are below reality." . "You have a high reality. Go to this guy". So that, by that just light touch, we've been able to make that people want to keep their technical things. We don't really have any; any; any real bad squirrel groups in the Free Zone. It's like they know. That if they don't get promoted or don't get excepted or some of them maybe doing some bad Tech, you understand. But, all the orgs were always doing some bad Tech. That's why they had Flag. Any Tech is better than no Tech. But I'm talking that's why they had Flag, you know, which was to keep it standard. But I am talking about the people intentionally changing the processes such as the RTC is doing right now. That's the biggest squirrel group in the world right now.

The other thing is, considering RTC, we have done some very heavy actions against them. When they started against us we did some heavy actions against them, which made them really withdraw from attacking a lot of the Free Zone people. And that was due to our actions, police actions in Munich, and police actions in Sweden, police actions in Spain, police actions in England. Coordinated these things through the local authorities and most of them have looked at RTC as being totally crazy. And they have protected people from the Free Zone and wanted them to continue doing their own religion or whatever they wanted and they saw how crazy these other people were. Private detectives and observing people and threatening telephone calls and screaming at them in the middle of the night. Then they say "These people are crazy." That's been pretty well established among the local law enforcement agencies.

That finally reached America back to the head office of RTC and they told them to stop doing these attacks in Europe, because you are actually in liability. They actually assigned them liability. Because they were loosing Europe. So they started now the "soft" approach – "Oh, come in we'll get it handled. [audience laughs] Bring your money." Well, we stopped those attacks that were so annoying to the Free Zone people. To get called up in the middle of the night and threatened, you know. And calling them

suppressive and squirrels on the telephone and things like that. That is pretty much stopped. So, we also got a couple of people, we also got a couple of people out of jail, very quickly. That would still be in jail if we hadn't worked very heavily to get the Free Zone working. One in Spain, a guy who was in the Free Zone there he got put in jail through some work of RTC. He was gotten out three days.

Interviewer: Pierre Folgenstromen?

Bill: No! He's, he's an RTC plant. No, another guy. A guy, a Spanish guy. And we got another guy out in Sweden, Todde Salen. I worked personally on that and got him out in 60 hours, out of jail. RTC had put him in. And, ah, there's other examples; That we helped in the Robin Scott case. We didn't do all of it, but we did coordinate a lot of data for Robin. And also in the line of Legal we have gotten together a lot of legal documents in the OTCs. Collected them. Now, when people need a legal document to handle something with RTC they come to the OTC. [Interviewer is mumbling in the background... They must know that!]. Then, we also have our own CF of people to write to and we've also established a computer network. Which we said we were going do last year and we did. Not all the people are linked up but at least three. Four, now, actually let's say four because there is one in the U.S. too. There's four of the most modern computers with the latest software and so on like that you can buy outside of the national governments. That you can use out in the public and we have them. Four OTCs.

Interviewer: Switzerland, and Frankfurt and...?

Bill: Madrid.... and the one in the home office in the U.S. Where there's a Free Zone group there.

Interviewer: That's Mark Jones?

Bill: No. So that is what is coming a long there. There's other things that, uh, would have to go through the, through the... My logbook to list them all, right. But there's the events. For instance the OTC World Wide put on about five of six events since last year in different countries. Events, lectures, like the one in Munich, two in Sweden, another one in England, a demonstration there. Another one in Germany, in Frankfurt. And a couple of smaller meetings in Spain, in Switzerland and so on. So we put on also events which coordinate. We've also have written a lot of letters to people that we hear about in countries where they haven't got the message yet. And we now are getting responses from France, Israel, New Zealand, Australia, Canada, some parts of the United States and England, Scotland, Sweden, Denmark, Germany, Austria, Switzerland. Right? All together there was sixteen countries that the OTC World Wide is in communication with at the moment. Ah. That's just on the third dynamic. That's all I am saying there. So there's a few things we have done.

Interviewer: And also on the energy project you have been working on?

Bill: Oh but now, you are talking about a different dynamic. You are talking about the fourth dynamic. Now that is more "New Civilisation" stuff. Let's put it under the heading of New Civilisation Game, right.

The New Civilisation is a project of LRH. Now it's big. It's not a small project. That is a project that is big enough to encompass the whole planet. So in the New Civilisation you have such things as energy. We need energy project which will make energy available to all at smaller cost and not waste it.

We have a project there of aesthetics which is new music and communications for people to get them more up tone about living and so on. Rehabilitate their purposes. Music project. We have in there also writing and companies, businesses that will produce Free Zone type survival. Like the water filters and things like that. To keep the poisons out of the body. This lines up with feeding people from the fourth dynamic into the third dynamic churches with the Purif and so on. We have, we have anti-radiation devices which are, which have been perfected for lower level cases by Dr. Prinz in Germany. That you can come and test them. They do, they do affect the field around, around the body, if you need them. I mean I'm saying as you go up the bridge you do not need them any more but when you have mass, energy in the reactive mass and it's impinged upon by radiation it will start upsetting you, you know. Just from the charge being released into the body. These little devices, shield, put a counter frequency out there cancelling the waves. They keep that stuff away, they really do. That's another fourth dynamic project.

Interviewer: This is also against this Tepaphones, right?

Bill: That's what I mean. That's the kind of radiation that they are using. You see. The devices... This is now going to be exposed for instance in a book. One of our Free Zone people is... knows Walter Bowart. And Walter Bowart who wrote the hidden story of the CIA and all that stuff. And the "Operation Mind Control ". He is writing another book now. He has written it already, I think. Which is called "The Invisible Third World War". And in that book, which I have read the synopsis of, you know, the small summary of. I have read the synopsis of. Walter Bowart confirms everything we've said about Tepaphones and all the devices in use today on the population of Earth. In fact he even says there are more things going on, then even I said in my Sector Ops Bulletins. He gives the name, the place, whose responsible for it. What agency is working it. Where their locations are, where the transmitters are.

Interviewer: Is that for publishing?

Bill: Yes, that is going to be the book. Walter Bowart. Buy his book and read it. It being put out by a press in Germany. It's coming out this year. Before

Christmas. Buy it. It's a good book. Notice that he said "The Invisible Third World War". You know what the First....

(Tape ends)

Tape 3: Tape starts during the sentence

...chapter of his book says. Just after the people who control things on the planet realized that another war would cause their own destruction most probably. Because it will be done with Atomics. They decided on a form of invisible warfare and he goes on from there. The object is to control your mind. He's not a Scientologist, Bowart, you know that. He is a guy who worked in the CIA for 20 years. And then he retired. Because didn't like what they were getting into the Drug and Mind Control Experiments and all that. And he joined up with the Citizen Commission of Human Rights in the United States. And I heard a lecture by him over there. And then he wrote that book. Before that he'd written "Operation Mind Control", where he talks about putting in deep level implants into the people to make them into spies and things like that, right? Which was done obviously on some of these assassins and so on that run around. And he exposed that. And then he exposed several other things. And now he is exposing this invisible third world war, right? He's a guy that has been there, he worked (Just like I worked in the Sea Org for sixteen years nobody and nobody believes me). He worked in the CIA for sixteen years and nobody believes him. You see. (Laughter) So we both, are just trying to warn people. Say, "Hey! Look this is coming, you know".

Interviewer: What do you the publisher? [Then some overlapping chit chat back and forth between Bill and Interviewer about the publisher, Sector Operation Bulletins ...]

Bill: Uh?

Interviewer: The publisher from this book?

Bill: Yes? Bruno Goll.

Interviewer: And he made also another book about the Sector Operation Bulletin? Or is that that book?

Bill: Who?

Interviewer: Bruno Goll?

Bill: No. Bruno Goll is going to publish, ah.... First of all he is publishing three more things for the Free Zone. He likes to get products. He is putting out,

first he is putting the "New Civilisation Game" out in a nice thing that can be mailed out to all the readers.

Interviewer: (Interrupts while Bill is talking). But we have a nice booklet.

Bill: Hey, listen, you are interrupting the interview. You are not talking as a reporter right now. You're talking as somebody who is a book publisher or something. Wear your reporter hat.

Interviewer: OK (Laughter)

Bill: Put your hat on, your reporter hat on. So he is putting out a "New Civilisation" thing to be sent to the readers who asked in the last issue of "Diagnosum", which is coming out in December. There is going to be the rest of Sector Ops Data on the Marcabians and on the New Civilisation Game is going to be all printed in a book. Then he is going to put out a nice blue thing which has those articles from the "Diagnosum" and the New Civilisation Game in it. And offer it in an ad [ad: advertisement] to all the readers of the "Diagnosum". It's going to be in German. Then he is going to do a copy in English. Which I will use to send out to people from the OTC and so on and to other allies. That we have been accumulating over the year. That's another thing we have done in the OTC. Accumulated allies for the Fourth Dynamic. People that are interested in health and natural resources, natural foods, people who are against poisoning the air poisoning the Earth, wars and all that stuff.

You get all these people together you get quite a large bunch of allies. And people who are suspecting the international bankers. For instance the over 200 clubs in the United States, or groups. There are over 200 political clubs in the United States that are against these same international bankers. They don't know what they call them. They don't know who... that they are Marcabians. But they do know that they are the guys that are controlling all the currencies and the money. And that bothers them because they are Americans and they like money and they don't like that they take it away, you see?

Interviewer: OK. So, can you tell a bit, I know it's a special question, but a bit how you get the data about the "One Worlders" and so on?

Bill: It's called... well, on this planet it would be called Intelligence Work. But in the Patrol it's more of a, it's a combination of that plus a lot of using OT perception, right. And actually knowing where to go next. Instead of just maybe reading all the newspapers in the world. Maybe going to the right one and saying "I think it's in there". Picking it out. That's what I want. That's the guy. Right there. Let's go check them out, you see. So it speeds it up quite a lot. And you run into the data and then you permeate, then you penetrate, then you go in. Like for instance if I want to find about the top Swiss banks, or something like that. I go into a top Swiss bank then I get all the data that they have in there and then I read it. And then I find the

outpoints and I check out the people. Then I go to a directory and check out who is this guy, who is he connected with. And then I maybe go to, or get somebody else to go to a company's place and find out if he is on the board of directors of an arms company. And then you get all that stuff and then you put it together. And you read the research books and you do this and listen to peoples' stories. And you talk to people that were in the Wehrmacht and the Luftwaffe and the old... and worked on the construction projects in Arabia. And you listen to people who were hit by the World Bankers. And you listen to people and you talk...and you get data and you get data and you put it all together, right. It's just like a reporter does. Except it's a little more quiet. You might... You don't go as a reporter, to do that. You see, you actually dig and get it. It took me, after I took from where the GO had left off, it took me two years, nearly three years, see, 80, 81, 82, 83, yes, nearly three years to come up with the rest of that data. And I was working on it continuously.

Interviewer: And how you get the Marcab data? Is that only with your connection to LRH or have that also other... ?

Bill: Well, LRH had already, had already, indicated the Marcabian influence on the planet. He had indicated it not only on a tape a long time ago. But he had indicated it to his son Quentin, who used to talk about it in his lectures quite a lot. He'd also, anybody that's been around this sector for a long time knows the Marcabian Conspiracy, or Confederation. It's a small group of planets. They... They are well known around here. What can I say? They are well known! Anybody remembers them. You can find somebody...You can go the book stores, some of these mystic book stores, you can buy these books about the Egyptians and Atlantis and all that. And you find in that books also there is these people they call the Dark Ones. And the Evil Ones. And they always use machines and they always use things to control your mind. And watch out for these guys because they come down and they represent the Devil or whatever and they try to take over peoples' souls and they try to use machines and radiation on them. And so on. Well, they are just describing what they remember of the Marcabians. They like computerised societies and so on. That's the guys. To hold everybody in place. Not to free up the comm lines but to hold everybody down. This data is all over the place. You go to the book stores and you find about the Dark Ones. They even call them... They have one wrong datum about them however, but I think it has been put in by the Marcabians themselves. They think that they come from Sirius. And they don't come from Sirius. They think they are from the star Sirius, they're not. They are not from there. They are from around the Big Dipper.

Interviewer: Yes. Can you say how do you get the data that the 200,000

Bill: I know why they put that wrong data in there too. I know why they put that there too.

Interviewer: Why? Bill: Huh? Interviewer: Why?

Bill: Because they don't want you to think that they are where they are from. You might remember them. They want you to think they are from Sirius which is out towards the Central Area and make you think they are the good guys. Who also you will also in these books you will find these people called the Galactic People and so on like that.

Hey sit down, you don't leave your post. It's just a telephone ringing! It's just the telephone ringing, take it easy man.

Because they don't want, ah... they want people to think they are from around Central and that they are the good guys. Cause in these same books of people writing about Atlantis and all that stuff you'll find that they mention these people called The Federalisationist or The Galactic People who are the good guys. And that's what they remember.

Tape 4:

Bill: Anyway.

[several people talking at the same time..]

Bill: What's the next question? Now wait. Who is asking a question? What? What? He's got a question.

Interviewer 2: Have you been at the tower at Basel?

Bill: Yes! Oh yes. I've observed... I have tried to get into it. I got only into the guard desk then they threw me out.

Interviewer 2: Oh, I see. Yes, I can imagine.

Interviewer: Can you say how you got the data that 200,000 Marcabians are on this world?

Bill: Yes. That was the number that since 1930 they were trying to bring down here to assist them here in taking over the planet, right. It's not very many actually. As long as they are secretly. But, what happened was when the Bank of International Settlements got set up it was known at that time that they were going to set that up as their central place for their planetary collection of all the gold. Because they want to sent it back to Marcab, right? And that's part of their game to steal the gold from planet Earth and they also at that time requested the requisition from Marcab, exactly 200,000 junior executives to help them by... as spiritual beings to go in an take over the heads of some of the banking and so on in different western countries. Business, Political, Banking and so on like that. In their

constitution written in 1930 you will find a clause which says: "There are 600,000 shares in this bank. 200,000 of them are to be shared amongst the member countries in proportion to their contribution. 200,000 shares are to be put between the directors of the bank. 200,000 shares are to be kept secret and individual. It's the same exact number that I already gotten that was the number of Marcabian guys that are on that planet. They all have their numbered share in the vault in Basel. They are not to be left out of that place. That is their recognition number. In case they lose the body. They give that number and they get back into good status, you see. They have an identity number on that share of the Bank of International Settlements. Just like an old sailing ship used to go out every man of the crew had a share in the profit. Every Marcabian on this planet has a share in the Bank of International Settlement and 60% of the world's gold. Just like the old pirates. Well read your constitution, it's written right in there. Because who else would be 200,000 people that own 200,000 share in a NON, a NON public bank that was supposed to be set up somehow internationally between a few countries. Private individual shares not to leave the bank. Can you explain it? We have a copy of their constitution. So, you can get it.

- Interviewer: [mumbles a bit to himself about the question, then phrases it correctly.]
- Interviewer: Can you say a bit about this telepathic communication to LRH? How it works?
- Bill: Ah yes. It works through LRH's personal communicator or Elron Elray's personal communicator on the "Mship", all right? Just as if he, you were writing to him in an Org you would send it to the LRH personal communicator.
- Interviewer: How we can imagine that..... [mumbles half a question, then asks a question clearly].
- Interviewer: I think this Mship must be some metal, some MEST?
- Bill: Yes, it's very big. It's a mother ship or main ship. It's a space ship.
- Interviewer: What's the name for this ship?
- Bill: "Inexorable".
- Interviewer: Inexorable. [mumbles a bit] I think LRH have a MEST Body on the ship also?
- Bill: People used, no. People have asked me that before. You see thetans don't., yes, they can use a body, right? LRH is an OT. Let's face it. He... On the Mship, they have doll bodies. You know what a doll body is?
- Interviewer: A Theta Body...?
- Bill: No, a DOLL, doll, a doll! It's not a robot, it's not a metal machine thing. If people will stop imagining themselves for a moment as a biological entity and imagine that they could be constructed. Their body. Out of a very

supple type of plastic. And then bones, plastic or whatever. It would never need to eat and they could still run it electrically and had all the circuits in it that you have in your body. Just take away all the junk that you need to eat. You know, all the flesh and blood stuff and just make it into a doll, but more or less it still works electrically and flexibly. You see, that's a doll body. They are very common in the universe. And on the Mship most of the crew, or just about all of them use doll bodies. Except when they are on mission on a planet. When they go on a planet they use the type of body that's used on that planet. If anybody remembers their track they will remember this. It's very simple. It's obvious. I mean, when you are in space for a long time and when you are in an organisation for many, many years it would encompass many lifetimes of people on Earth; you don't want a meat body and have to store up food and go around killing animals and stuff like that. You have a doll body. You see. Then you don't have to carry chicken and pigs and horses and all that shit with you. Much more efficient. Anyway, yes, he can use a doll if he wants to. He probably has five or six of them up there. All right? I know that I have at least three in my cabin up there. So what's the problem? I mean, you know, like you go to a closet and you have different outfits to wear. Right? For going to business or to go to sports. It's the same way with a doll body. You have different kinds. Some are very athletic and some are very just sort of the executive type. Diana Hubbard wrote an article about this in one of the Advanced Magazines. Did you ever see it?

Interviewer: Never.

Bill: Never did? It's in one of the Advanced Magazines or one of the High Winds Magazines, I believe, one of Sea Org Magazines it's written in. It's a whole article about Doll bodies. Jesus! You guys never kept up? Anyway, we must remember that in Scientology there is the basic premise that people are thetans. They are not their bodies. And when you get up to certain situation or level you don't really need to use a body. That's one of the goals of Scientology. And LRH reached that a long time ago. OK?

Interviewer: OK. Back to this Mship. What's the job of the Mship? Is it watching about Earth?

Bill: No. Come on. Are you kidding? Earth is just a little piece of the game. No, there are hundreds of Galactic Patrol ships in this sector. Hundreds of them. The Mship is the Main-ship. The base of the sector commander. Just like your navy. If you are in a country that has a navy. If hundreds of ships but only one of them has the whole admiral, the full admiral on board. Same thing. So it isn't even around here. It isn't even around Earth. It's usually in between Central, Marcab and somewhere around here. Depending on what the duty is and what the patrol is and where it has to be for operations. But it gives orders to other smaller ships to handle things, in certain areas.

Interviewer: And LRH is the admiral?

Bill: No. He is the Sector Commander. And also member of the council, Grand Council.

Interviewer: What is his main job?

Bill: His main job? You mean his duties? But I just told you his jobs. Well, first of all as a duty he is a member of the Grand Council. Which is the guys of all the civilized planets and they meet together and decide certain things. They don't make laws, for the guys. They found out you cannot run a Confederacy or a Federation or a NATO, or anything like that. They don't run that. They run a sort of a free trade type of thing. There shall be peace and there shall be guys trading and so on like that and the Patrol, the Galactic Patrol, is set up to ensure there's a maximal amount of freedom for interchange, communication and commerce and so on. And that people are not forced into slavery or anything like that, you see what I mean? That it's not suppressive. That it does not get too suppressive. Unless they want it suppressive. I mean, people can want it suppressive. The people that live on Marcab they like that game. A lot of Marcabians here. There's people here on Earth that love the Marcabian game. They love to lord it over everybody and rip money off. They like that. You know. I mean, you can't blame them for that. They like it. So, they're not there... They like it. They like it. That's why I say you, you have to have a different viewpoint to handle things in this sector. You can't go and say: "Hey, that's wrong". You can't run around and being God or anything.

Tape 5:

Bill: However, if they start to make war on a planet to take it over, you see, that doesn't believe in that. That's different. Then the patrol will interference and stop that bullshit. Just like they stopped all the Marcabian ships from coming into this sector right now. I mean into this zone, the Free Zone of Earth right now. There's no Marcabian ships coming in here. Whatever Marcabians they have on this planet, they are the only ones we have to handle.

Interviewer: Basically, the Marcabians cannot come to Earth where they get the order it's Free Zone, no?

Bill: The Marcabians are already here. They been here the last...

Interviewer: I think they must leave, because it's the Free Zone? And the Galactic...

Bill: They have become Free Zone citizens, but they still have an allegiance to Marcab. Just like if you are a German or Austrian and go to Switzerland you are still an Austrian, you see. But they want... . But if there were enough of you the might want to take over Switzerland for Austria. (laughter). Ha, ha... Yes. Anyway, that's the way they are. The only ones we got to handle are the ones down here. What they are trying to do is make the planet decide to

be Marcabian. What we want to do is make a decision between Marcabia and the New Civilisation. And the Free Zone. That's the difference. So, they're going to try and make it, so that everybody is thought controlled, and they don't see anything and they don't believe anything else. Then, ok, we'll go along with what it says in the news papers. You see? And then they say: "Look, look, look. All this people on Earth, they want to be, the majority of people on Earth, they want to be Marcabians, you see. And then that's it's it, finished. Then there won't be any more game here.

[some cross talking over each other here]

Bill: I'll just go some where else and do it again!

[some cross talking over each other here]

Interviewer: About handle them, other Galactic Patrol...

Bill: What's that? What, what. What is the question?

Interviewer: About handle the Marcabians, how would be done? Galactic Patrol not, but how much people are there of the Galactic Patrol...?

Bill: Well, on Earth there are supposed to be 10,000 activated, right now.

Interviewer: On Earth? hmm!

Bill: 10,000 activated.

Interviewer: Oh! I think 10.

Bill: Oh! You are only thinking about the ones you know in Scientology. There's only about 10, yes. All the rest are the sleepers, they were waiting.

Interviewer: And you are also in contact with the others?

Bill: Well, no. Not all. They know what to do. They get the orders directly. They had... In fact, you see this is how brilliant LRH's plan was. Everybody was send down and they already had their plan of what to do in the case of a certain contingency. And the contingency would be – "If it became impossible for LRH and the regular troops that were with him to go ahead and expand Scientology and get people up to a level where they can decide to be free or decide to be Marcabian, or whatever". And when that didn't work these other guys were activated. Now those people have been activated last February, right. I got the message and they were activated. They are not Scientologists. But you will know them when you see them. In fact I know Herman has already met two or three of them that are Japanese. They have taken Japanese bodies, for waiting over there.

Interviewer: Can you say a bit about the strategy against the "One Worlders" and Marcabians, or is it better you not...?

Bill: No, it already has been done. The strategy is already right out there in the New Civilisation Game, which is an idea that... You know how many things they are doing. And the rest of the strategy was done last June 21st and I did it. Because I am the coordinator for all the strategy here because nobody else was doing it. So I assigned everybody "Danger" and I did it myself, on the Fourth Dynamic. I did, I personally put everyone in "Danger". It was tried... That was supposed to do something. I sent those four things to those key people in the world.

Interviewer: Can you tell a bit about this? What did you do?

Bill: Well those are essentially the expose of the Game... in the Sector Ops Bulletins, plus the New Civilisation Game plus the Plan for World Peace of LRH, plus the data they needed to align their actions. Now these people were people who were picked out very carefully by me. In three years I have been trying to get people to get me a line to them. Get me a line to this guy, get me a line to this guy, and this is important. These are the people that could....

[N.B. Tape 5: at 5m:09s There is a break here in the recording from 5m:09s through till 5m:13s.

Interviewer: This is the Dalai Lama,

Bill: He is the opinion leader of the Buddhist... [05m:18s]

Interviewer: Of the Buddhist, and the prince of ..?

Bill: The king of Morocco. And the Emperor of Japan. He is their spiritual leader.

Interviewer: And the other guy?

Bill: The other one was just because LRH had once said that Reagan was a friend of his and he had send him a 17 page thing when he got elected and although Reagan Q&Aed a lot with the Marcabians now. I decided to give him another chance and I found out that the Mormons had an advisor very close to Reagan. The Mormons are very straight, straight arrows. They don't go with the Marcabians. They have their own barter system, their own everything. Hidden in the mountains for their own survival. They're just ready for anything.

And they, ah, were worth a shot. So I send it on the Mormons Church lines to see if they could get it to president Reagan if he wants to do anything about it. But at least they could do something about it. The Mormons themselves. So they may do something. I haven't had an indication of that yet. But the others there have been responses. In the newspapers very strange articles and not understood by the Marcabians at all what's happening. For instance. I'll just give you a few examples. I gave these out in June, before June 21st, Midsummer's Day.

They were on the lines to each of those people. I know they got there. Because they were put on... Not on the mail. Nothing was done by the mail or anything else that anybody could take off the lines. It was done through embassies or directly to the assistant that it got to the Dalai Lama or through the Embassy of Morocco or through the Intelligence Service of Japan. Just got them to them. And through the the Mormon church people themselves. Right through the directors of the Mormon church. So they got there. They got to those people. I know that. OK, So, next, we see these following events happening, as seen:

1) At the Buddhist Conference in August the Buddhists decided to open their own bank.

2) At the Buddhists Conference in August all of a sudden the Chinese and the Buddhists got back into friendliness. And you realize the Chinese are the ones that kicked all the Buddhists out of Tibet, but suddenly they are friends again. And now the Chinese have asked them to come back and have the next congress in China. And they were enemies of the Dalai Lama, not two months before that. Because there was promo put out by the Buddhists that said these Chinese communists were the guys that threw the Buddhists... A hundred thousand Buddhists got kicked out of... Or left voluntarily with the Dalai Lama in exile from Tibet. And now the Chinese communists are saying "No, we want you back, come back". Why?

The next thing is: That the Chinese communists are now making friends, making the North Vietnamese make friends with the South Vietnamese. Ah! Sorry, sorry, Koreans, South Koreans. The North Koreans make friends with the South Koreans, all right? Which is un-... Nobody can explain this. But they are doing it. They've opened the borders for the first time.

The Japanese are also making friends with the South Koreans. So they are establishing a whole link of oriental peoples. Through China, Japan, North Korea, South Korea, through all the Buddhists lands, all the way to Ceylon. The word is spreading very fast. That the Marcabians were the guys that are splitting us. Get back together.

The second thing is Morocco. All of a sudden Morocco did several... this month and last month did several unexplainable things. They made peace with Libya. They were at war with Libya and Algeria before that. A little small war. They made peace with Libya. They made peace with Algeria. Opened the borders. Just like the other guys did. Called the conference of all the Islamic nations. They're a peace, a peace conference in Rabatt. OK? That was the other guys, right.

Tape: 6

Bill: ...and said in their strategies, so why these guys were sent these things so they could get together and form an opposition to the Marcabians and now

that has moved over from there to Jordan and they're trying to bring Egypt in on it as well. Right, ok. That's why they're doing it. Now they understand the game. Do you know that when we were down in Morocco in 1972, the King Hassan and Lamrani, his Prime Minister asked personally for Mary Sue or LRH to give them more data on the world bankers. Because they knew that something was going on there, that was very bad for them. And now they got the data.

Interviewer: I didn't know that. [then some chit chat, muttering from the interviewer]

Bill: Of course you do.

Interviewer: And, yes that's big success.

Bill: Well, we may have, we may have by the end of this year, 2 billion people against the Marcabians. The Japanese, the Buddhists and the Islamic nations added together is over the half the population of the world. So as I say the strategy has already put in motion – you see. Without hardly any help from any Scientologist...

Interviewer: From the Church of Scientology.

Bill: From the church, from these so called OTs they have around in the United States. Absolutely no help from any of them. A few...help from the guys of the Free Zone around Europe. That's all. Because it just takes an idea and an communication line to the people that have their interests threatened and can realize it. Because the Marcabians look at people like ants. If you realize their viewpoint. Remember they are just thetans. They take over bodies just like you do. But they have a certain viewpoint, politically, that every Earth being is like an ant. And you can smash him with your thump and the Earth people are to be kept in a little glass thing just like these ants. That's ants you know. Watching them work in the sand. And the Marcabians just... They make gold you know and then they just pull it up to Marcabians. It's the way they consider Earth: "It's just a little ant hill". And if these fucking ants would wake up! Or then maybe we could have a Free Zone civilisation. But they are so dead by these Marcabian's PR and bullshit that they spread around. And they keep giving them the power. But the only power Marcabians have is the money they keep paying up to them. It's the only power they have. Because as beings they are not very powerful. It's just that they have inhuman cunning and evilness on how to handle people and they do that continually. If you spend out all day long figuring out as an SP how to do somebody in you'll be pretty successful at it. You see? Well that's their philosophy and they do it, all day long. You see?

Interviewer: Another question. It was the question before but we can't do so much I think. Um, You have told it already but, for this interview.... How do you start...How's LRH start a comm-line to us with telepathy? What was the situation. You said it was two weeks or it was not a long time before this OTC World Wide Congress in Marbella ... Can you tell about this?

Bill: Yes. Well first of all let me... See, a lot of people have a Miss-U on telepathy. Telepathy is not hypnotism or anything else like that or, or, uh... stuff that is passing for telepathy on this planet, right. Or mind reading. It isn't any of that. It's a simple... simply a form of communication. Like a telex machine. The only thing is that it didn't have any wires. And it's from thetan to thetan. You do not have to be in a body to do it, you see. That's all. And it's difficult for anybody that is not, well, that hasn't been audited. It's difficult, believe me.

I have had telepathic communication with LRH since 1965 when I was on the Briefing Course. And so have many auditors who were trained under him. They will tell you so if you ask them. Many auditors who were trained class VI or VIII under LRH realized that he used to come and give telepathic instruction and C/Sing to them in the auditing room. That was the first, and that was for auditing, see.

So you'd be in TR 0 see that you wouldn't have your bank around and you could go "wow." LRH.. And that's why he asked in the policy... Why do you think he keeps saying that in the policy. "If all else fails, ask yourself 'What would LRH do?'" And when you do that, you think of LRH. And when you think of LRH he gets a beam, "Somebody is thinking of me". And he says: "Ah, the auditors are having trouble. OK. Fly this rudiment or pull this overt". It's as simple as that. It's just an OT ability. You can get it before you are OT, of course. You can get it on gradient all the way up. However I am talking about telepathy now as practised in the, inter-space travel. In space travel you have to use telepathy. It's the only practical means of communication between space ships and different planets. Because it's fast. It's faster than anything else. It's faster than... It has no barriers.

Interviewer: You have said you will make in Frankfurt in one month or so a lecture about that?

Bill: A seminar, yes. I want to make a tape about it.

Interviewer: Perhaps we can also introduce the readers from this interview a bit about telepathic data. As she can... theta people can make it also.

Bill: Well, first of all I would advise anybody to go first to a Free Zone centre and to go up to Clear and then to go up on their OT levels. Because first of all the hardest thing with telepathy is getting through the bank. If you have a bank there, it's very difficult because the first thing that you find out it that you are pushing, pushing through energy ridges and you don't have a telepathic comm line you are pushing pictures and emotion and all that shit. So, that's why I have found out on this planet today by using telepathy. Just being able to spot it and hear it... No, you do not hear it really, it's not that at all. But you can hear if somebody is using the wrong frequency. It's just like on the radio. You have different frequencies, alright.

Now you know somebody can walk into a door and shout or somebody can yell at you over the telephone or someone can talk to you from the radio. All those are different. And if your speakers are bad, they are coming like "Ahhhhnnn", like that. And it can be loud or soft and you have to get the difference between that and between something in your bank. Maybe an old ridge or something activating and going "Blank-o-wank-a-wonka" at you, which had nothing to do with anything. You know that. But when you understand the telepathic comm-line. The thing to understand is, it's very light. It does not have any mass on it. The real telepathic comm line is very simple. It's just as easy as thinking a thought. But you have to put yourself in the position of the terminal you are communicating with and he puts himself in your and you just "Buhhmmm". You make contact there with no space in-between.

Interviewer: But how... A special question: I have heard that some thetans without bodies make, like to make jokes, yes? Are you sure you are talking with LRH and not with a joking guy.

Bill: Well, a person that's not well trained in it can get fooled. And in fact Sven Peterson in Sweden was fooled. How you can see in his letters. I have them in there. And he has been fooled by a guy who was trained in Russia as a telepath. He is now operating in Switzerland and he is working out of the Celebrity Centre Zurich, right. He's a Russian guy but he's got some kind of western identity card now.

Tape 7:

And he is a guy who was... actually sent around, it's part of his training, almost. He is sent by the Marcabians to come over here and try to interfere with the so called "Free Zone Telepathic Network". They think we have this big network of telepaths.

Another Interviewer: What's, the name of this guy, this Russian?

Bill: This Russian guy is named... Ahhhhh. He doesn't have a name in the West, yet. But the name he... yes... the card he has got is something like.....fuck, Ummm, what's the name.... I got it written down back there when I picked up his signal line. I wrote it down. Ummm... Anyway, the guy is actually putting out messages as if they came from LRH.

Interviewer: Faking it!

Bill: Yes, he is faking it, just like the RTC is doing it. But he's faking a telepathic comm. And being... I was trained telepath in the GP for a long, long, long time. And I caught that this... There was this guy that was using a human wavelength. You know what a human, you know like, sometimes you get a – you know when somebody, ah... When you walk into an embarrassing

situation. You open a door and somebody is in the bathroom. You get this sort of "Phussst" thing at you. "Oo! Don't come in here, you know." Like that. That's not a telepathic line that you use. But you can get the idea. That a sort of human pushing of ridge and emotion at you. Saying: "Don't come in here. I am in the bath room". See what I mean. You feel it. You actually feel it. Well these guys are using... These Russian and American guys don't know what a thetan is. So they are using a human emotional push. Telepathy. And it's like... It's as different as listening to this radio and listening to a real symphony orchestra. A real telepathic line is real. It's not, it's not this fucking, "pluuurrah". You know, pushing emotions and words out. You don't push words. It's THOUGHT, you see. Well, this guy, I picked him up in Sweden and he was... It was his words, he was trying to get Hermans, trying to get Hermans to give them some false messages from LRH. And I was visiting them and I ... "Hey, who is that? Somebody is communicating. He says; "I have an urgent message for you. This is from LRH. I have an urgent message for you. This is from LRH." Who the hell was that? LRH? No way. This isn't even telepathy. This is some guy faking it. It was not coming to me. It was coming to the Hermans. I was around their area. They were asleep. They did not catch it. So I told them afterwards and he said: "I'll be damned!" And while he was doing it, of course, his beam was so intense, that I, you know, so emotional that I just picked up where he was. I could just ride back on his line and I could see where he was. He was in this building in the second floor. I described the building to Sylvie and she says; "Ahh. That's the Celebrity Centre in Zurich". Yes, that's where he is. In the second floor and he's got a friend there that has a black motor cycle. Was this guy's, with yellow stripes down the sides. Yes, I saw the whole scene there. Because when a guy puts a line into you, you can ride back on the line, just as a receiver. But don't say anything, just pick up the terminal and you get this whole viewpoint. Of what he's seeing, what around him and so on.

So, it's very interesting. But anyway he's the guy that probably messed up Sven Peterson. Sven Peterson now thinks that LRH wants auditing and has come to Sven and Sven should borrow a lot of money from the Marcabians. Oh God! He is really messed up. And I have written him already and told him it's a false line. He didn't believe me. This is the... This is the... ah... about the eight millionth time that somebody didn't believe me then bought it. And they had to bite the bullet, right. He is biting the bullet. But now I found out who the guy is that is sending to him. Now I will... or write him a thing and tell him exactly who the guy is. What he is sending on the line. How he tried to interfere with the Free Zone, etc, etc etc. Alright? Now the other thing is that the reason I know when I'm communicating is because:

- 1) I work on the Mship. I've worked there. I've worked there for fucking thousands of missions then. And before the mission on this planet, I mean, you know, I was still deputy to LRH up there. And I know the line very

well, right. I know the guy that's the communicator there. They have watches just like on a ship. You have telepathic watches and I know the actual room they work in, or the cabin they work in. It's the communications cabin.

Interviewer: The same situation as in your time, as you work on the Mship?

Bill: It's the same ship. Same beings. We're all on this thing together just like LRH was....

Interviewer: ...posts change just like in... musical chairs... ?

Bill: No, no post changes. I mean, look, weren't you around in Buddhism? Weren't you around in Buddhism? When LRH was doing the Buddha. There was LRH, he was still running things. And he was the Buddha. OK, what's next?. OK, He says "Take the message and take it to Japan". OK, go off and do a mission! It's the same game. What's so?... Just quit... People that don't have reality have to quit their thinking like a one life timer. Realize that the most suppression from this planet is coming from the Marcabians trying to make you believe that you are not a spiritual being and you only have one life. That is their biggest lie that they are putting in on the western civilisation. NONE of the Eastern civilisation believe that. The Buddhists don't believe it. The Shintos don't believe it, in Japan. The Islamics don't believe it. The guys in, Hindus don't believe it. NONE of them believe it. ONLY these stupid idiots in the West. Yes, see? So, that's where their first lie is. They have never really become a Scientologist. Because a Scientologist is dedicated to knowing the truth of knowledge. Knowing how to know. And if he doesn't know that. The first lie the Marcabians have made: "You are a body. You are piece of meat. You only live once, so just enjoy it. Be calm. Buy insurance, buy insurance, buy your car, buy your boat and then owe us all the money the rest of your life and stay quite. Don't plan for the future. Buy a big coffin. Have a big funeral and that's it for you." That's all false, you see that's false data. That's what makes insurance companies rich. That's what makes insurance companies really rich. It's because people think they live only once.

Interviewer: OK. Do your comm line to LRH. Um, um? Can you say a bit how often that is? Are you every day in communication, every week, or..?

Bill: No, in the beginning. When we were just getting the operation going in 1982. There was about everyday I was getting something. In fact I kept it pretty constant. I have log books... about "this many" log books of telepathic communication, back and forth and for other people and sending messages to LRH and answering them and so on. I have about that much. I might publish them someday as a book. Five hundred pages of telepathic communications. So what! It's just like telexes. They are exactly like telexes. Because we were doing it at 12 o'clock GMT and Midnight GMT everyday.

- Interviewer: What's GMT?
- Bill: Greenwich Mean Time. Just like a telex. So we would have all the traffic back and forth two times a day. And then it went to one time a day. And then after the Free Zone Decree, LRH said: "OK, you are on your own now." We only communicate when urgent, necessary, we just... We have a standing times of 12 and 12 on planet Earth time to communicate with you. Or you communicate with us if you want. But otherwise we just put in urgent or an SO One¹ call and we put in and it through. So now it's very, it's very loose, because we all know the... I've sent them all the data I have found out about the Marcabians. They've sent us all the data that they know about the activating the 10,000 guys. And we just communicate when we need to. What else is there to communicate about. I mean it's just a matter of seeing the game through, you know. It's just about...
- Interviewer: And at 12 o'clock you can directly communicate to LRH ?
- Bill: No, no, no, I didn't say that. That's the time for the communication with the communication office. Now, LRH communicates with them at a certain time as well. I don't know what time. But, they have, they will have the answer from him. Now I can get directly to LRH, if I want, if I want, but what for?
- Interviewer: OK. In the most times you get via this communications officer?
- Bill: Yes that's what they are for. It's LRH's pers-comm.
- Interviewer: And how long when you give this telex to this communications officer, about the answer, and how long does it take?
- Bill: It takes... It takes as long as it takes to read it. That's all, and write it. As long as it needs to read in the one direction and to write in the other direction. That's very fast. And the other thing is, it's a real... it's more... yes... you don't have to type, you just write it down as it comes from. (End of tape)

Tape 8:

Continues:

So, it's ability, that most people find they have been trained in, I'm sure. You can actually practise it. That's what I was going to give the seminar about. Because I wanted the people to start picking up these Russian and American telepaths, you see. And reporting to us all the stuff they get. You know what I mean. So that we can expose them as well as being one of the threats to freedom on the

¹ Standing Order Number One Line. Aka: S.O. Line No. 1.

planet. You know these guys are very inexperienced and they are just planning dirty war games and stuff like that. It's telepathy. So, anyway, they are training telepaths in Russia and America and England probably too... for war. Or as spies and stuff like that. And they are very inexperienced. They are not good telepaths. But remember, they're organized. Remember what LRH says about organisation. Anyway. That's their Top Secret stuff right now.

Interviewer: [stumbles with some words – sentence says nothing...]

Bill: Anyway, you can practise... you want to practise telepathy, get with somebody and put some objects on a table. Sit across from them and say: "Start" and they think of an object and you tell them what it is. And then change it, you know. You think of an object and they tell you, they think of one you tell them and so on and so on. When you get good at that, and then when you get good at that, take the same objects, and you take half of them in here and half of them in there, in the next room. And then do it.

Interviewer: [Talking non-English with another person briefly. "...Ah! That's for training!"]

Interviewer: You have the last time we talked about this at the dinner. You said: "If I want I can get some answers from LRH, and you give him the...". Yes, you write down what you want me to say. So that was very interesting. I think perhaps we can make an interview with LRH.

Bill: Yes, you must write down what you want to say and you give it to me as a letter to him. If you want to interview him then you don't give it to me, I am just relaying. You write it to him, put the questions, and I will send it and I will probably get the answer in a week, or a day if it's really urgent.

Interviewer: But you cannot send this letter?

Bill: Huh?

Interviewer: You cannot send this letter?

Bill: No. I TELEPATHIZE. I want that for my records. I have a record of every comm that I have sent. I am a pretty good communicator. And I want that record of your writing of exactly what the question is. I will send it and receive it back in the next traffic or whenever I get a chance to call in and get it. Right? And I send you the answers. I have people doing that with me on my comm lines already. Just write it down. You translate it to English and write it "To LRH" and not to me. I am not answering.

Interviewer: But on the envelope I can write your name?

Bill: Put it inside.

Interviewer 2: What happened to LRH's body here on Earth?

Bill: He doesn't want us to know yet. Because that's one of the parts of the game, that's one of the parts of the game that's being waited to be revealed at a

certain time. Which won't be to far in the future, actually. His body. That's a... that is a thing we know that he is not in it. And we know that he is already back on the Mship doing his regular job. Now what exactly happened to his body? There's many speculations. But, what I got from his communicator he is using that as sort of a hidden card to expose at the right moment to make the Marcabians really, really eat shit. You know what I mean? Then when... Right at the point when they think that they have all... everything sowed up and the church is all... looks like it's totally... nobody is going to expect anything. Then all of a sudden this datum will pop up about what happened to LRH's body. So, don't worry about it at the moment. Don't worry about it at the moment. It's going to be used.

And the other thing is, always remember this: LRH, to my personal observation of him in 1967 could mock up a body. You could see it with your eyes. Not just theta. You can see it.

Interviewer: How did you know this?

Bill: He did it in front of around 30 Sea Org members in 1967 in his office. And not only one body. He mocked up different ones. All right? And we could see them, all of them.

Interviewer: How did you hear this?

Bill: I have seen it. Just telling you. I have seen it. A perfect mock up of a body. And he was showing different... Roman, mock ups, and Phoneticians and different coats. So, the thing is, what happened? Did somebody, you know, did somebody, think they got rid of a mock up. Is his body still around somewhere? Is it hiding out in the... and the guys think they have got a mock up under captive or killed it, or something. Who knows which one he did. He could have done anyone of those little tricks. You see, anything you can do with a card, LRH can do with a body. You understand a card trick?

Interviewer: Yes

Bill: Put up your sleeve or you give another one, have another one appear and ..pshhh. He can do that. So, whatever the game is on it, he is keeping that as a nice little secret till the right time.

Interviewer 2: He gave up the church?

Bill: Humm?

Interviewer 2: He gave up the church?

Bill: He gave up on the church in 1982. I have the telex on that, yes.

Interviewer 2: What does it say on this?

Bill: Humm?

Interviewer 2: What does it say on this?

- Bill: Well he basically said: "That's it. That's the last chance they get." The last chance they got was to save the field in 1982 and it was given to Kerry Gleeson, as ED Int. And he failed. I was the one that delivered the message to him. "Will you support the field?" LRH said... gave me three questions to ask him. He answered positively on all the questions and then he betrayed his own answers. Because he was ordered by David Miscavige. So, LRH said: "That's the last chance. That's it". That was in April-May, about May, yes, about May in 1982, after that there was no more. LRH was not interested at all. You remember that David Mayo got his letter from LRH in April 1982. I got the sector Ops Bulletins, and was told to start up outside, that was 1983.
- Interviewer: Is LRH in telepathic communication with David Mayo too?
- Bill: I don't know. He hasn't said so. David Mayo hasn't said so.
- Interviewer: And with Mary Sue?
- Bill: I am sure he is. I am sure he is.
- Interviewer: Are you in comm with Mary Sue?
- Bill: I am not in direct comm with Mary Sue because I do not need to be. She is working on a different project.
- Interviewer: But she is really a Free Zone person.
- Bill: Yes.
- Interviewer: You could say this.
- Bill: You have to realize that she is working on project that she doesn't want any of us to communicate to her at the moment. She has got to play a certain part. And the part is, the part she is playing. You see the part in pictures and so on like that. Just came out of jail and her husband disappeared. In the court, she goes into the court, and she makes sure, you know, that RTC doesn't get the documents. Very good. Yes. But she is playing that part and her job essentially, which is, well it's not for the tape anyway. Not for the tape, but you can get the idea. She has some things to make up for, for not seeing those guys in the GO. They were screwing it up. To make some stuff right.
- Interviewer 2: And what about Diana? Diana?
- Bill: The same. She is...(Tape ends).

Tape 9:

...in confidence with Mary Sue. So, we don't associate on those lines of the Free Zone until they finished their job and when they've finished their job they will leave the United States, for sure. That's how we'll know they're finished. [audience laughter].

Interviewer: Another question what happened now with Xenu? Have he a new body?

Bill: He is still hiding out in New Strasbourg, France, right. It doesn't matter to me where he is. He has not come forward to me in a new body yet. He has not come out the political lime light. Into the open, in a new body yet. My feeling and my knowledge on that thing is. He is around Strasbourg, France. He has dropped the old body and he has got another one. But it is still not the body that he wants to use as the final "Leader of Earth" type of thing. Not that one. But he is hanging around Strasbourg. I could go over there, I could go over there probably and in two days I could find him.

Interviewer2: Kaffee?

Bill: Kaffee, Kaffee. Fantastisch.

This was a tourist's paradise.

Interviewer: It still is.

Bill: It can be. Yes. But if you take of all the suppression away from the planet. All the banking, the wars and all that shit, right. You just take a view point of the planet with the tourist centres, all the music, and the games and the playing around, films and theatre, and beaches and swimming. People doing their vacation, you know. Just picture vacation all year round. Skiing and everything went through summer on the whole planet. Different resorts all around in the mountains and everything. Big natural parks like in Africa with all the animals running around and all the people take pictures of them and everything. Hey? Safaris. All kinds of vacation. And some real big cities with casinos and pleasure places, with food, good food, and all that for meat body people. You imagine that? That's how it used to be. That's how it used to be. A lot of... It was the vacation planet to come to from the other places, other planets.

Interviewer 2: What do you think about the International City where he talks about, on the Saint Hill Special Briefing Course.

Bill: Anyway. That was this place anyway. This planet was an old vacation place. That's why it has a such great scenery and all that stuff around. OK, very nice.

Interviewer: Do you know when Herr Strasbourg left his body?

Bill: Which one? The old man body. The old one he was calling him Strasbourg. Yes, I picked it up as about, I think it was... I got it in my book. It was around around April or May this year.

Interviewer: This year.

- Bill: This year. After we chased him out of Basel. We actually spotted him and chased him out of Basel.
- Interviewer: But that's for sure?
- Bill: Yeah. He ain't living in Basel. He may go back there occasionally but he is not living there.
- Interviewer 3: But I have major question...
- Bill: [Sound of coffee being gulped down.] Oh, boy!
[sound of coffee cup being put down on saucer.]
- Interviewer 3: ...about the Sector Operations Bulletins. [very quietly in background]
- Interviewer : [Interrupts with] ...And with this picture here? That's very interesting.
- Bill: Yes, yes, that's the body he had just before.
- Interviewer: We know that guy. Per Jacobsen. But I think that you said that's from 1970 or so.
- Bill: The picture is older yes, but...
- Interviewer: But how long was this guy in this Strasbourg body? Only for a few years?
- Bill: This body is NOT Strasbourg. This is PAUL Strasbourg, but it is actually Per Jacobsen's body. Per Jacobsen faked his own death in London in 1963.
[Interviewer 3 explains to interviewer 1 in German. Es ist immer noch Per Jacobsen aber er wird Strasburg genannt. Er hat das gefakt. Er hat so getan als ob er gestorben wäre.]
[i.e. It's still Per Jacobsen but he is called Strasbourg. He's faking it. He faked that he had died.]
- Bill: He faked a new name.
- Interviewer 2: What name.
[Discussion between the interviewers.]
- Bill: I got the whole... That body, yes..... This is Per Jacobsen, see. This is Per Jacobsen. And if you take and measure a blown up photograph of that and Per Jacobsen's face. You will find it's the same. Exactly the same in all dimensions. He did that. That's one of the part of the investigation. Because Per Jacobsen was the guy who controls from behind the scenes, controlled all of the Earth's governments. From the death of Roosevelt, get it, from the death of Roosevelt, up until 1963. Yes! And that's the track LRH wanted. Who was the guy that Xenu went to after Roosevelt. We have found him. Per Jacobsen through the Bank of International Settlements. That's how we found him by investigating who was in the Bank of International Settlements from that time to that time. Per Jacobsen was the boss. Behind the scenes he ran everything. He would call up on the telephone and tell the United States what to do. He would call England and tell them what to do.

Call up Sweden tell them what to do. Make this law. Do this, do this do that. He was the only guy that could do that. The only one.

Interviewer 2: Did he live in Switzerland?

Bill: He lived in Basel.

Interviewer 1: Loit Villa?

Bill: Loit Villa, got kicked out, you know. He got fired. Because Hermann blew him. Hermann started investigating him. Pushed, pushed his anchor points in enough to where got all shaken up and they fired him. He sent him a few letters and stuff like that and said, you know..

Interviewer: He is not any more that....?

Bill: No, we got him fired.

Interviewer: He has also lose his job?

Bill: He lost his job. He got put down the org board. The Marcabians put him down.

Interviewer: Oh. Because of only Hermann?

Others: Only Hermann!....

Bill: Yes, ONLY Hermann! They got worried. He just put in Galactic Patrol ethics in on him. The guy got worried. You see the Marcabians are not cohesive. They are about.. like the church, right. They have a split. There are many factions. Marcabians they all want to fight too. Two main factions.... [interviewer speaking over Bill] ...The two main factions of Marcab are the ones who just want to *control* you; and the ones who want to *control* you AND *implant* you. Alright?

The control faction is represented by the Rockefellers.

[Some people are talking in the background across Bill....]

The control and implant faction is represented by, right now, Xenu's...

[someone coughs loudly or sneezes, masking out the word after "Xenu's"] Gesundheit! ...he is at the top. Rockefellers...

Interviewer 3: He's not important?

Bill: No, no, no importance.

Interviewer 1: Um. This photo from the, is that from a magazine?

Bill: No, It's from a secret Year Book that they put out in the Bank of International Settlements. You can't get a copy of it.

Interviewer 1: But, I have seen this printing by this...

- Interviewer 3: Are all federal banks private in all states or is it just in Switzerland and the U.S. ?
- Bill: This is a very secretive bank. This one.
- Interviewer 3: Not this one, but I mean like in Austria we also have a federal ... which puts out the money you see printed. Is it also private?
- Bill: It's probably privately owned. Yes. In all the countries they have controlled, it's probably private. Not even Austrian. It's probably their... You check it up. Look at their charter. They have probably *nothing* to do with the government at all.
- Interviewer: Can we print this picture?
- Bill: Yes. Go ahead. What the hell?
- Interviewer: I must check with copyright problems. But... copyright! [laughs]
- Bill: Just go and print it, what the hell man. You know... All they can do is take your body away.
- Interviewer: [mutters something]
- Bill: Well the reason they do, is not because of copyright problems. It's because that they... It might be found out that they are the ones that got it. The book was gotten illegally. Well... She's the one that should say on that, because she actually got the book. To print it is a little different because it might through a suspicion on them. I don't know if the Marcabians know that we have that book.
- Interviewer: But I think the Marcabians know a lot of you, I think so. Yes... much people knows all this stuff and so on. And so I think also, I think your life is...
- Bill: I'm not taking about me. You understand? I'm taking about a piece of property that could probably... Maybe could result in some bad legal consequences on Sylvie. Who lives in Switzerland, you understand. I don't live in Switzerland. I don't give a damn. You don't live in Switzerland, so you don't give a damn. But somebody lives in Switzerland and that comes out of a Swiss private publication thing. And that is copyright in Switzerland and they could... BUMP, you see? That's what I'm thinking.
- Interviewer: Yes, but the other point on that is... What's with... [some German words]
- Another Interviewer: Is his life in danger through this... ?
- Bill: It has been, yes, several times. Many times. But that's what LRH has trained us for. We have a lot extra awareness and ability to predict. I mean we can usually predict these things and avoid the consequences of anything that's being set up for us. Like I'll tell you one right now that I am avoiding; Right – Sven Peterson. He got a false telepathic message from LRH. False, from this guy in Switzerland, right? And then he invited me up there to help him rip off the Bank of Sweden for two million Krona. Right? He picks up a

castle, right. Well this is obviously a set up to get me up there and trap me in some kind of legal problem as it happened. So they could say "Look, he's a criminal.". Like they did with Mary Sue.

But the Marcabians know that that it doesn't do any good to do anything physical to a Galactic Patrol member. They'll just pick up another body and maybe they'll pick up one right in the Bank of International Settlements. Put a gun at their head, you know, whatever. So it doesn't do them do it any good to do it that way. They have to discredit them. That's what they did with LRH, with Mary Sue, etc., etc.. You see? So they don't try to kill you. They did. They have tried to assassinate him several times, but accidentally. Always accidentally. They always have to try it accidentally. You know. Like having a zombie drive a car and then run right into you. You know? That happened three times in the United States.

Interviewer: yes, to you?

Bill: Yeah, to me. Then to it... Or to do it with a beam, you know, with the tepaphone beams. Pick you up when you are on a high speed car or something like that and give you a command to go to sleep or to turn your hand like this on the wheel and run off the road. They will do that. They will do that kind of thing, but it always looks like an accident, you see. That's what they try to do. They don't want to do any overt type thing. Because then they would get into real trouble. Real trouble.

Interviewer: Yes, these tepaphones... A question about it. I can imagine that like these satellites, they come, these flows. But I cannot imagine that in every city 10,000 or more of these tepaphones. I never see these things.

Bill: No. They don't have 10,000 tepaphones in a city. They maybe have one or two. Or one at the masonic lodge for a use in the masonic lodge or they may have a high powered one. You go to Frankfurt, they have several up to...

(Tape Ends during sentence. End of Interview recording).

=====

NOTES:

Walter Howard Bowart (May 14, 1939 – December 18, 2007) was born Walter Howard Kirby and adopted as a newborn baby. (CBR pronounces this as "Browhart")

He wrote "Operation Mind Control " in 1978.

His book/manuscript of "The Invisible Third World War" was apparently never completed.

see: <http://myweb.cableone.net/mtilton/bowart.htm> and

http://en.wikipedia.org/wiki/Walter_Bowart

The Mship's name: "Inexorable". [English definition – "not to be persuaded, moved, or stopped: relentless"]

Ceylon: A large country south of the Indian sub-continent is currently called Sri-Lanker.

Diagnosum: on tape3 – at 02m:39s

Bill perhaps is referring to a German magazine or newsletter published by "Dianasis Data Network" in Germany. Founded by Irene Mumford in UK? (she died in 1991).

Dianasis was franchised around the world as – "Centre for Personal Enhancement – (CPE)". Barry Fairburn represented "Dianasis" at an Independants' Convention in the early 80s. He may be able to either identify "Diagnosa"/"Diagnosum" as a spelling error or slip of the tongue. The UK magazine was called "Outward Bound".

Bruno Goll: Priorly he was translating and publishing works by Ruth Minshall into German, with agreement from CofS. Also to translate and publish other works such as "None dare Call it Conspiracy". This continued until 1978 when the cofS stopped publication and sale of non-LRH authored works. Bruno Goll left the CofS around this time.

[N.B. Tape 5: at 5m:09s There is a break in the recording from 5m:09s through till 5m:13s. That is, 4 seconds of quiet hum surrounding 1.5 seconds of silence and a click – someone pulled/swapped the microphone perhaps?] [i.e. at about 46m:35s on the whole lecture].
