

PROFESSIONAL AUDITOR'S BULLETIN No. 23

(From the Researches and Notes of L. Ron Hubbard)

2nd April 1954

HAVINGNESS

Starvation for energy is the keynote of any case which maintains facsimiles in restimulation.

The thetan who holds facsimiles to the body has chosen to have the energy *in spite of* the perceptions and significances in it. He is attempting to have the energy and not have the aberrative quality of it. Thus he is posed the problem of trying to reject the thought and accept the energy and thus he cannot do either.

In Dianetics we gave him the energy by processing out the significances (perception) in it.

When well exteriorized a thetan may have his energy so far reduced that he becomes unhappy. Having him create and snap in anchor points upon himself (not the body) will remedy this unhappiness.

Matched terminalling, admiration processing and any other process which reduces energy, at length "starves" the thetan for energy.

All these conditions are remedied by remedying the "havingness" of the thetan.

As we saw in Acceptance Level Processing (PAB 15) only certain energy forms may be acceptable to the thetan. This is regulated by the screens he has erected against things. By setting up a resistance to certain energies, he creates an eventual appetite for them. He sets up screens to resist the form and the screen becomes plus for the form on the far side and negative for the form on the near side. As the screen caves in upon him (by being pounded by the unwanted form) it eventually causes an appetite (vacuum) for the form. Thus he actually starves for a form he once detested. This is the dwindling spiral of the Mest Universe. The thetan believes he has to have the form to survive.

The remedy of havingness is necessary for all cases at and below Step IV of SOP 8.

An Auditor remedies havingness by "starting an avalanche", by making the preclear begin an automatic inflow of acceptable things, then graduates the preclear rapidly to avalanches of stars, planets, heavy masses and spaces.

It is density and mass which count, not specific items.

Degradation begins when the thetan is interiorized into unwanted mass. It is completed when, having developed an appetite for heavy mass, he is exteriorized from it.

In this lifetime the downfall of any thetan began with his loss of some heavy mass. The heaviness of the mass was the value of the mass. For instance, an auditor wishing to trace the feeling of degradation in a preclear would look for a time when the preclear lost or was removed from a massive object. The auditor then has the preclear mock up the object and change its quality better or worse until it "snaps in" automatically on the preclear. Then the auditor has the preclear mock up enough of the object to create an avalanche. The preclear must then add more and more to the

inflow, then add planets, stars and black stars until the preclear can comfortably throw several dense objects away in mock-up. A reverse (outflowing) avalanche is then begun and run.

Outflowing and inflowing avalanches are run on the preclear until his "hunger" is satiated.

Numerous facsimiles may appear. The auditor continues with the dense masses in avalanches, not the facsimiles. The facsimile will "blow".

This process, run for four or five hours will create a Book 1 Mest Clear.

Perceptions are turned on by running "acceptable" smells, lights and sounds in avalanches. Masses are more important than perceptions.

L. Ron Hubbard is now in Arizona, at 806 N. 3rd St., Phoenix, Arizona. He is conducting groups of auditors through a six weeks Advanced Clinical Course.

The courses have been in progress since October 1953. The Fourth Unit is ending March 27th, 1954. The Fifth Unit beginning date is March 29th. The Sixth Unit begins May 3rd, 1954, and so on.

Currently an auditor is given three weeks of personal auditing and three weeks of training. The success of these units is building a very heavy waiting list which is limited by selection.

As the routine of the courses is refined by Ron, the percentage of clears early in the course increases. In the first week of the Fourth Unit Ron personally made nine theta clears. Such clears then work forward toward operating thetan.

The courses will continue every six weeks in Phoenix. Application with all qualifications must be made in writing. The course fee is \$800 in advance, little more than an expert intensive run.

Those credited with course completion are made, after some field work, Doctors of Scientology.

The course also includes fast training in psychoanalysis (easily understood through Scientology). By special arrangements graduates are certified as qualified psychoanalysts by the Freudian Foundation of America.

Ron's aim in the clinical course is to provide a type of training which will not then require further course fees at later dates. His students are welcome in all classes and reviews thereafter without charge.

Sometime in 1954, Ron hopes to hold a similar course in the United Kingdom. The date and place have not been arranged. However, all applicants must already have graduated from the London HAS school and have their HPA, just as all applicants in the Phoenix course must be HCAs.
