TWO PROFILES

This is a dispatch from Ted Lange to LRH dated March 5th, 1959:

Dear Ron,

I am sending you profiles of two recent homosexual preclears who have caused much trouble for the HGC, plus the Random Male.

Both of these profiles show lower on Stopped Trait and Withdraw than the Random profile, otherwise both fall within the range. Also from personal contact with both of them I have the feeling that they are both of the same type. Extremely self-centered—total emergency nothing can be done for me—I can't do anything for myself.

The dotted lines indicate the earliest test and the solid lines indicate the latest test.

The earlier profiles of an idiot preclear also fell completely within the Random area.

Best,

Ted.

AMERICAN PERSONALITY ANALYSIS

This profile describes PRECLEAR No. 1.

Before Intensive: -----

After Intensive: -----

Limits of
Random Male:

NOTE: Random Male = APA tests marked wholly at random without looking at any of the questions. This area, if filled by a preclear's graph, shows he understood little if any of the test = no reality = no responsibility.
